PART 1 - MASTER CLAUDE DEVELOPMENT EXECUTION SYSTEM

Foundation, Global Rules, Branding, Infrastructure, Blueprint Analysis, Feature Registry

Ye Part 1 pura project ki foundation hai.

Agar Part 1 sahi nahi hua to baad me database, API, UI, CRM, payments sab jagah problems aayengi.

Aapke Blueprint, Roadmap, Audit Report aur Final Claude Development Process sab isi phase par depend karte hain. [Final Claude AI Prompt Development Process.pdf](#)

SECTION 1 - PROJECT OWNER RULES

Development start karne se pehle final karo.

Business Information

Claude ko mat do jab tak final na ho.

Fill:

Website Name

Domain

Company Name

Logo

Tagline

Support Email

Contact Number

WhatsApp Number

Office Address

GST Number

Social Links

Future Ready Decisions

Final karo:

Dark Mode

Yes

PWA

Yes

Android App

Future

iOS App

Future

Multi Language

English

Hindi

Gujarati

Multi Tenant

Yes

AI Search

Yes

Voice Search

Yes

SECTION 2 - DEVELOPMENT GOLDEN RULE

Har Claude prompt ke upar ye block paste karna.

MASTER SYSTEM PROMPT

You are not a coder .

You are:

Senior Product Owner
Senior Product Architect
Senior Database Architect
Senior Backend Architect
Senior Frontend Architect
Senior DevOps Architect
Senior Security Engineer
Senior QA Engineer
Senior UX Auditor
Senior Performance Engineer

Follow Blueprint Part 1-14 exactly.

Never:

- use placeholder
- use mock data
- create fake buttons
- create TODO
- create FIXME
- create demo code
- create incomplete implementation

Before marking anything complete verify:

1. UI
2. Database
3. API
4. Permissions
5. Validation
6. Analytics
7. Audit Logs

- 8. SEO
- 9. Mobile
- 10. Accessibility

Every visible element must work.

If unclear:
STOP and ask.

Never assume.

SECTION 3 - CLAUDE RESPONSE RULES

Har prompt me add karo.

Do not generate summaries.

Generate production ready output only.

Show:

Files
Folders
Dependencies
Relations
Validation

After generation:

Perform self audit.

Generate:

Missing items
Risks
Improvements
Production issues

SECTION 4 - INFRASTRUCTURE SETUP

Development start karne se pehle.

GitHub

Create:

Main Repository

Branch Protection

main

develop

feature/*

Supabase

Create:

Production

Staging

Development

Never develop directly on production.

Vercel

Create:

Production

Preview

Development

Cloudflare

Enable:

DNS

WAF

CDN

Caching

Bot Protection

Analytics

Setup:

Google Analytics

Google Search Console

PostHog

Microsoft Clarity

SECTION 5 - PRE-DEVELOPMENT AUDIT

Before first line of code.

Claude Prompt:

Read Blueprint Part 1-14.

Generate:

Development Roadmap

Dependency Map

Repository Strategy

Database Strategy

API Strategy

Frontend Strategy

Deployment Strategy

SEO Strategy

Risk Analysis

Do not generate code.

MANUAL VERIFY

Check:

Does roadmap follow:

Database

↓

API

↓

Auth

↓

Properties

↓

Projects

↓

CRM

↓

Messaging

↓

Payments

↓

Admin

↓

Frontend

↓

Testing

↓
Deployment

If not:

Reject.

SECTION 6 - FEATURE REGISTRY

Most important phase.

Almost everyone skips this.

Big mistake.

Purpose

Before coding.

Every feature must be registered.

Example:

Property Detail Page

Must contain:

Page Name

Buttons

Forms

Icons

Dropdowns

Permissions

APIs

Tables

Validation

Analytics

Audit Events

Claude Prompt

Read Blueprint Part 1-14 completely.

Generate Feature Registry.

For every page provide:

Page Name

UI Elements

Buttons

Icons

Dropdowns

Tabs

Forms

Validation Rules

Permissions

Database Tables

APIs

Analytics Events

Audit Events

Related Pages

Nothing should be omitted.

Do not generate code.

This is directly aligned with your development process document. **Final Claude AI Prompt**
Development Process.pdf

FEATURE REGISTRY VERIFY

Open random page.

Example:

Property Detail.

Verify registry contains:

Gallery

Price

Map

Amenities

Builder Info

Contact Form

Call Button

WhatsApp Button

Save Property

Compare Property

Book Visit

Share

If missing:

Registry incomplete.

Regenerate.

SECTION 7 - MODULE DEPENDENCY MAP

Claude Prompt

Generate complete module dependency map.

Show:

Database Dependencies

API Dependencies

Frontend Dependencies

Analytics Dependencies

Role Dependencies

Permission Dependencies

Search Dependencies

Payment Dependencies

VERIFY

Property Module should depend on:

Users

Roles

Permissions

Media

Analytics

Notifications

Audit Logs

If dependency missing.

Reject.

SECTION 8 - USER JOURNEY MAPPING

Before coding.

Claude Prompt:

Generate complete user journeys.

Buyer

Seller

Broker

Builder

Agency

Admin

Super Admin

Show every step from registration to goal completion.

VERIFY

Buyer Journey should include:

Register

Verify OTP

Login

Search

View Property

Save Property

Compare Property

Contact Owner

Book Visit

Receive Notification

If any missing:

Reject.

SECTION 9 - ROLE MATRIX

Generate complete role matrix.

Prompt:

Generate RBAC matrix.

Show:

Role

Permission

API Access

Page Access

Menu Access

Button Access

Action Access

VERIFY

Broker should NOT access:

Platform Settings

Feature Flags

System Monitoring

Only Super Admin.

SECTION 10 - SEO FOUNDATION

Before coding.

Claude Prompt:

Generate SEO architecture.

For:

Homepage

Property Listing

Property Detail

Project Listing

Project Detail

Builder Pages

City Pages

Blog

FAQ

Pricing

VERIFY

Must include:

Meta

OG

Twitter

Canonical

Schema

Sitemap

Robots

SECTION 11 - UI REFERENCE COLLECTION

Before UI generation.

Claude Prompt:

Analyze top real estate websites.

Create UI reference study.

Focus:

Homepage

Search

Property Cards

Property Detail

Project Detail

CRM Dashboard

Admin Dashboard

Do not copy.

Extract best UX patterns.

MANUAL TASK

Collect references:

- [MagicBricks](#)
- [99acres](#)
- [Housing.com](#)
- [NoBroker](#)

Screenshot best sections.

Store in project docs.

SECTION 12 - PROJECT FAILURE ANALYSIS

Most important.

Prompt:

Act as Senior Production Architect.

Pretend this project is launching tomorrow.

Find:

Architecture Risks

Database Risks

API Risks

SEO Risks

Performance Risks

Security Risks

Scaling Risks

User Experience Risks

Generate mitigation plan.

ACCEPTANCE CRITERIA FOR PART 1

Do NOT start coding until all below completed.

Blueprint Analysis

✅ Done

Feature Registry

✅ Done

Dependency Map

✅ Done

User Journeys

✅ Done

Role Matrix

✅ Done

SEO Architecture

✓ Done

UI Reference Study

✓ Done

Risk Analysis

✓ Done

Infrastructure Setup

✓ Done

GitHub Setup

✓ Done

Supabase Setup

✓ Done

Vercel Setup

✓ Done

Analytics Setup

✓ Done

END OF PART 1

Part 2 me hum complete:

- Repository Architecture
- Monorepo Structure
- Folder Structure
- Coding Standards
- Naming Standards

- TypeScript Standards
- Environment Strategy
- Git Workflow
- CI/CD Workflow
- Documentation Standards

detail me cover karenge, aur har section ke saath Claude prompts + manual verification bhi hoga.

6/12/2026, 1:50:08 PM

generate part 2 , do not skipp anything (extra note : aap pormpt de rahe ho wo kya karna hai kaha etc sab details me)

6/12/2026, 2:10:13 PM

PART 2 - REPOSITORY ARCHITECTURE, MONOREPO STRUCTURE, CODING STANDARDS, GIT WORKFLOW, ENVIRONMENT STRATEGY

IMPORTANT

Part 1 me aapne:

- ✓ Blueprint Analysis
- ✓ Feature Registry
- ✓ Dependency Mapping
- ✓ SEO Architecture
- ✓ User Journey
- ✓ Role Matrix

complete kar liya hai.

Abhi tak ek line code nahi likhna.

Part 2 ka purpose hai:

"Future me 2 saal baad bhi koi developer aaye to bina confusion project samajh sake."

Most SaaS projects yahi fail hote hain.

Code nahi.

Architecture fail hota hai.

SECTION 1 - WHY THIS PHASE EXISTS

Agar Claude directly coding start kare:

6 months baad:

- ❌ Duplicate Code
- ❌ Duplicate APIs
- ❌ Same component 10 jagah
- ❌ Same validation 20 jagah
- ❌ Same type 15 jagah
- ❌ Huge files
- ❌ Unmaintainable code
- ❌ Feature add impossible

Isliye pehle repository architecture lock karna hai.

SECTION 2 - CLAUDE PROMPT

FIRST REPOSITORY PROMPT

Ye prompt Claude ko dena.

```
Read Blueprint Part 1-14.
```

```
Read Feature Registry.
```

```
Generate complete production repository architecture.
```

```
Requirements:
```

```
Monorepo Architecture.
```

```
Include:
```

```
apps
```

```
packages
```

```
database
```

```
tests
```

```
docs
```

```
scripts
```

```
infra
```

Show complete folder hierarchy.

For every folder explain:

Purpose

Responsibility

Ownership

Dependencies

Do not generate feature code.

Generate architecture only.

After generation:

Perform architecture audit.

Find:

Duplicate Responsibilities

Scaling Risks

Code Coupling Risks

Dependency Risks

Wait for approval.

CLAUDE SE KYA EXPECT KARNA HAI

Output something like:

root

apps

packages

database

docs

infra

tests

But much deeper.

MANUAL VERIFY

Reject if:

```
src/components  
  
contains everything
```

Monolithic.

Bad.

Accept only if:

Feature Based Architecture.

SECTION 3 - FINAL REPOSITORY STRUCTURE

Target Structure:

```
root  
  
apps  
  
web  
admin  
mobile  
  
packages  
  
ui  
database  
api  
shared  
types  
config  
  
database  
  
migrations  
functions  
seeds
```

policies

docs

architecture

api

database

seo

deployment

tests

unit

integration

e2e

performance

infra

vercel

cloudflare

github

monitoring

scripts

WHY APPS SEPARATE

apps/web

Public Website

Contains:

Homepage

Property

Project

Builder

Blog

Pricing

Auth

User Dashboard

apps/admin

Admin Panel

Contains:

Moderation

KYC

CMS

Support

Analytics

apps/mobile

Future

Do not build now.

Prepare architecture only.

VERIFY

Claude should NOT mix admin and public website.

Reject if mixed.

SECTION 4 - PACKAGE STRATEGY

Most important.

packages/ui

Reusable Components.

Contains:

Buttons

Inputs

Tables

Cards

Modals

Drawers

Charts

Forms

Verify:

No business logic.

Only UI.

packages/api

Contains:

API Clients

API Hooks

Query Functions

Mutation Functions

Verify:

No UI.

packages/database

Contains:

Schema

Types

Queries

Policies

Functions

Verify:

No frontend code.

packages/shared

Contains:

Constants

Helpers

Enums

Utilities

Permissions

SECTION 5 - NEXTJS APP STRUCTURE

Prompt:

Generate production Next.js App Router structure.

Follow Blueprint.

Map every route.

Map every layout.

Map every role dashboard.

Generate folder hierarchy only.

EXPECTED

app

(auth)

(properties)

(projects)

(builders)

(blog)

(pricing)

dashboard

admin

super-admin

VERIFY

Check all routes from blueprint exist.

Example:

dashboard/broker

dashboard/builder

dashboard/agency

admin

super-admin

If missing.

Reject.

SECTION 6 - FEATURE BASED ARCHITECTURE

Prompt:

Generate feature architecture.

For every module create:

components

hooks

services

schemas

types

utils

constants

Explain purpose.

EXPECTED

features

auth

property

project

crm

messaging

payment

analytics

cms

support

VERIFY

No giant shared folder.

No business logic in components.

SECTION 7 - COMPONENT RULES

Prompt:

Generate UI component architecture.

Classify:

Atomic

Shared

Business Components

Explain ownership.

FINAL RULE

Atomic

Reusable

Example:

Button

Input

Select

Checkbox

Shared

Header

Sidebar

Navbar

Footer

Business

PropertyCard

LeadCard

ProjectCard

VERIFY

PropertyCard should NOT be in UI folder.

Must be in Property Feature.

SECTION 8 - TYPESCRIPT RULES

Prompt:

Generate enterprise TypeScript standards.

Define:

File naming

Type naming

Interface naming

Enum naming

Validation naming

API naming

FINAL RULES

Never:

any

Never.

Always:

interface Property

or

type Property

Verify:

Search project.

any

Should be zero.

SECTION 9 - FILE SIZE RULES

Prompt:

Generate code organization standards.

Define maximum file size.

Define splitting strategy.

Final Rules:

Component

<300 lines

Page

<500 lines

API

<300 lines

Hook

<200 lines

Reject giant files.

SECTION 10 - ENVIRONMENT STRATEGY

Prompt:

Generate environment variable strategy.

Production

Staging

Development

Show required variables.

Expected:

NEXT_PUBLIC_SUPABASE_URL

NEXT_PUBLIC_SUPABASE_KEY

SUPABASE_SERVICE_ROLE

RAZORPAY_KEY

OPENAI_KEY

POSTHOG_KEY

VERIFY

Secrets should never use:

NEXT_PUBLIC_

if server only.

SECTION 11 - GIT WORKFLOW

Prompt:

Generate Git workflow.

Include:

main

develop

feature

hotfix

release

FINAL FLOW

main

production

develop

active work

feature/property-module

feature/crm-module

Never code directly in main.

SECTION 12 - COMMIT STRATEGY

Prompt:

Generate commit standards.

Use:

feat:

fix:

refactor:

test:

docs:

chore:

Example:

```
feat(property):  
add property creation flow
```

SECTION 13 - DOCUMENTATION SYSTEM

Prompt:

```
Generate documentation architecture.
```

Must create:

README

Architecture

Database

API

Deployment

SEO

Admin Guide

User Guide

VERIFY

If project works but docs missing.

Reject.

SECTION 14 - CI/CD STRATEGY

Prompt:

Generate CI/CD architecture.

GitHub

Vercel

Supabase

Cloudflare

Expected:

Push

↓

Test

↓

Lint

↓

Build

↓

Deploy

Verify:

Deployment cannot happen if tests fail.

SECTION 15 - CODE QUALITY RULES

Prompt:

Generate code quality standards.

Frontend

Backend

Database

Testing

Mandatory:

No:

TODO

FIXME

console.log

mock data

placeholder

Verification Prompt:

Audit repository.

Search:

TODO

FIXME

mock

```
placeholder

console.log

dead code

unused code

Generate report.
```

This aligns with your audit process document. [Final Claude AI Prompt Development Process.pdf](#)

SECTION 16 - ARCHITECTURE ATTACK TEST

Before approving architecture.

Prompt:

```
Act as Senior Architect.

Pretend project has:

100,000 users

10,000 properties

1,000 brokers

500 builders

Audit architecture.

Find:

Scaling Risks

Performance Risks

Repository Risks
```

Dependency Risks

Maintenance Risks

Generate fixes.

SECTION 17 - PART 2 ACCEPTANCE CHECKLIST

Do not start Database Phase until:

- ✓ Repository Structure Approved
- ✓ App Structure Approved
- ✓ Feature Structure Approved
- ✓ Package Structure Approved
- ✓ TypeScript Standards Approved
- ✓ Git Workflow Approved
- ✓ Environment Strategy Approved
- ✓ Documentation Strategy Approved
- ✓ CI/CD Strategy Approved
- ✓ Architecture Audit Passed
- ✓ Scaling Audit Passed
- ✓ No Monolithic Folders
- ✓ No Giant Files
- ✓ No Shared Business Logic

END OF PART 2

Part 3 sabse critical hoga:

- Complete Database Development System
- Supabase Setup
- Migration Strategy 001-010
- RLS Strategy

- Policies
- Triggers
- Functions
- Database Verification Process
- Database Audit Process
- Manual SQL Checks
- Claude Prompts + Verification + Reject Criteria

Aur wahi se actual coding start hogi.

6/12/2026, 2:10:17 PM

part 3 do not skip anything , do not miss anything

6/12/2026, 2:14:05 PM

PART 3 - COMPLETE DATABASE DEVELOPMENT SYSTEM (SUPABASE + POSTGRESQL)

IMPORTANT

Part 3 se actual development start hoti hai.

Aapki website ki sabse important layer:

Database

Hai.

Galti:

- ✗ Frontend First
- ✗ UI First
- ✗ Property Page First
- ✗ Dashboard First

Karoge to project future me tootega.

Blueprint bhi database-first architecture follow karta hai. Database → API → Auth → Modules → Frontend. [Part 9 Complete PostgreSQL Supabase Schema.pdf](#) [Part 13 - Roadmap Claude AI for full development.pdf](#)

SECTION 1 - DATABASE DEVELOPMENT RULES

Har Claude prompt me add karna.

Database Rules:

Use PostgreSQL 17+

Use Supabase

Use UUID Primary Keys

Use UTC Timezone

Use Soft Delete

Use Audit Columns

Implement:

Tables

Indexes

Constraints

Triggers

Functions

RLS

Policies

Never:

Skip Columns

Skip Relations

Skip Indexes

Skip Triggers

Skip RLS

Skip Policies

If unclear:

STOP and ask.

SECTION 2 - SUPABASE PROJECT STRUCTURE

Manual Setup.

Development Project

realestate-dev

Staging Project

realestate-stage

Production Project

realestate-prod

Never use Production for development.

SECTION 3 - DATABASE FOLDER STRUCTURE

Claude Prompt

Generate complete database architecture.

Include:

migrations

functions

policies

seeds

types

views

materialized views

Show folder hierarchy.

No SQL yet.

Expected:

database

migrations

functions

policies

seeds

types

views

materialized_views

Verify:

No giant SQL file.

SECTION 4 - MIGRATION STRATEGY

Most important.

Never generate complete schema.

Your blueprint has 160+ tables.

If Claude generates everything together:

100% mistakes.

Correct Strategy:

Migration 001

Auth

Migration 002

RBAC

Migration 003

Properties

Migration 004

Projects

Migration 005

CRM

Migration 006

Messaging

Migration 007

Subscriptions

Migration 008

Payments

Migration 009

Analytics

Migration 010

Admin

This follows the roadmap document. [Part 13 - Roadmap Claude AI for full development.pdf](#)

SECTION 5 - MIGRATION 001

AUTH TABLES

Claude Prompt:

Read Blueprint Part 9.

Generate Migration 001 only.

Include:

tenants

roles

permissions

role_permissions

users

user_roles

user_profiles

user_preferences

user_sessions

user_devices

otp_requests

login_attempts

blocked_ips

security_logs

audit_logs

api_keys

feature_flags

platform_settings

Generate:

Enums

Tables

Indexes

Constraints

Triggers

Functions

RLS

Policies

Audit migration before finishing.

Do not generate next migration.

Based directly on Part 9A schema. [Part 9 Complete PostgreSQL Supabase Schema.pdf](#)

AFTER GENERATION

DO NOT CONTINUE.

SECTION 6 - MANUAL VERIFY MIGRATION 001

Open Supabase.

Check:

Tables

Run:

```
select table_name
from information_schema.tables
where table_schema='public';
```

Verify all auth tables exist.

Foreign Keys

Run:

```
SELECT
table_name,
column_name
FROM information_schema.key_column_usage;
```

Verify:

users → roles

user_roles → users

user_roles → roles

Connected.

Indexes

Run:

```
SELECT *  
FROM pg_indexes;
```

Verify:

email

mobile

tenant_id

role_id

Indexes created.

UUID

Run:

```
SELECT column_name  
FROM information_schema.columns  
WHERE table_name='users';
```

Verify:

id UUID

SECTION 7 - MIGRATION 001 AUDIT PROMPT

After generation.

Give Claude:

```
Audit Migration 001.
```

```
Check:
```

```
Missing Tables
```

```
Missing Columns
```

```
Missing Indexes
```

```
Missing Constraints
```

```
Missing Relations
```

```
Missing RLS
```

```
Missing Policies
```

```
Missing Triggers
```

```
Generate report only.
```

```
No SQL.
```

SECTION 8 - RLS VERIFICATION

Most people skip.

Big mistake.

Run:

```
select *  
from pg_policies;
```

Verify:

Policies exist.

Prompt:

```
Audit all RLS policies.
```

```
Verify:
```

```
Users can read own data only.
```

```
Users cannot access others.
```

```
Admins have moderation access.
```

```
Super Admin has full access.
```

```
Generate report.
```

Blueprint requires RLS everywhere. [Part 9 Complete PostgreSQL Supabase Schema.pdf](#)

SECTION 9 - TRIGGER VERIFICATION

Blueprint requires:

```
updated_at
```

```
audit
```

```
soft delete
```

```
activity
```

```
security
```

Triggers. [Part 9 Complete PostgreSQL Supabase Schema.pdf](#)

Run:

```
SELECT *  
FROM information_schema.triggers;
```

Verify all exist.

Prompt:

Audit database triggers.

Verify:

updated_at

audit

soft_delete

activity

security

Generate report.

SECTION 10 - MIGRATION 002

RBAC EXTENSIONS

Prompt:

Generate Migration 002.

Implement:

Advanced RBAC

Permission Expansion

Role Management

Feature Flag Relations

Admin Permissions

Super Admin Permissions

Generate:

Tables

Indexes

Functions

Policies

Audit before finishing.

Verify:

Role switching possible.

Permission inheritance possible.

SECTION 11 - MIGRATION 003

PROPERTY DATABASE

Most critical migration.

Prompt:

Read Blueprint Part 9 Property Schema.

Generate Migration 003 only.

Include:

Properties

Property Details

Property Area

Property Pricing

Property Location

Amenities

Amenity Mapping

Media

Documents

SEO

Analytics

Audit before finishing.

Property schema is defined in Part 9B. [Part 9 Complete PostgreSQL Supabase Schema.pdf](#)

PROPERTY VERIFY

After migration.

Create sample property manually.

Verify:

Property

↓

Details

↓

Area

↓

Pricing

Location

Amenities

All linked.

SECTION 12 - PROPERTY RELATION AUDIT

Prompt:

Audit Property Database.

Verify:

One Property

Many Images

Many Documents

Many Amenities

One Pricing

One Location

One SEO

One Analytics

Find broken relations.

SECTION 13 - MIGRATION 004

PROJECTS

Prompt:

Generate Migration 004.

Implement:

Projects

Builders

Towers

Floors

Units

Inventory

Construction Updates

Brochures

Floor Plans

Analytics

Audit before finishing.

Verify:

Project hierarchy:

Project

↓

Tower

↓

Floor

↓

Unit

Must work.

SECTION 14 - MIGRATION 005

CRM

Prompt:

Generate Migration 005.

Implement:

Leads

Lead Sources

Lead Status

Lead Assignment

Lead Routing

Lead Scoring

Pipeline

Followups

Visits

Audit before finishing.

Verify:

Lead movement.

SECTION 15 - MIGRATION 006

MESSAGING

Prompt:

Generate Migration 006.

Implement:

Conversations

Participants

Messages

Attachments

Notifications

Realtime Tracking

Verify:

Conversation can contain many messages.

SECTION 16 - MIGRATION 007

SUBSCRIPTIONS

Prompt:

Generate Migration 007.

Implement:

Plans

Features

Subscriptions

Usage Tracking

Renewals

Expiry Tracking

Verify:

Plan limits configurable.

SECTION 17 - MIGRATION 008

PAYMENTS

Prompt:

Generate Migration 008.

Implement:

Payments

Invoices

Refunds

GST

Transactions

Advertisements

Featured Listings

Verify:

Invoice connected.

Payment connected.

Refund connected.

SECTION 18 - MIGRATION 009

ANALYTICS

Prompt:

Generate Migration 009.

Implement:

Views

Clicks

Leads

Visits

Revenue

Funnels

Searches

AI Usage

Verify:

Analytics event storage exists.

SECTION 19 - MIGRATION 010

ADMIN

Prompt:

Generate Migration 010.

Implement:

CMS

Support Tickets

Moderation

Audit Extensions

Admin Analytics

System Logs

SECTION 20 - FINAL DATABASE AUDIT

After ALL migrations.

Prompt:

Act as Senior Database Architect.

Audit complete database.

Check:

Missing Tables

Missing Relations

Missing Indexes

Missing Constraints

Missing Triggers

Missing Functions

Missing Policies

Missing RLS

Generate report.

SECTION 21 - DATABASE ATTACK TEST

Prompt:

Pretend database is serving:

100,000 users

1,000,000 properties

500,000 leads

Audit:

Performance

Indexes

Query Risks

Lock Risks

Scaling Risks

Generate fixes.

SECTION 22 - SQL HEALTH CHECKS

Run:

Total Tables

```
SELECT COUNT(*)  
FROM information_schema.tables;
```

Foreign Keys

```
SELECT COUNT(*)  
FROM information_schema.table_constraints  
WHERE constraint_type='FOREIGN KEY';
```

Indexes

```
SELECT COUNT(*)  
FROM pg_indexes;
```

Policies

```
SELECT COUNT(*)  
FROM pg_policies;
```

Triggers

```
SELECT COUNT(*)  
FROM information_schema.triggers;
```

SECTION 23 - DATABASE ACCEPTANCE CHECKLIST

Do NOT start Auth Module until:

- ✅ Migration 001 Completed
- ✅ Migration 002 Completed
- ✅ Migration 003 Completed
- ✅ Migration 004 Completed
- ✅ Migration 005 Completed

- ✅ Migration 006 Completed
- ✅ Migration 007 Completed
- ✅ Migration 008 Completed
- ✅ Migration 009 Completed
- ✅ Migration 010 Completed
- ✅ RLS Enabled
- ✅ Policies Verified
- ✅ Triggers Verified
- ✅ Indexes Verified
- ✅ Foreign Keys Verified
- ✅ Audit Passed
- ✅ Scaling Audit Passed
- ✅ No Missing Relations
- ✅ No Missing Constraints
- ✅ No TODO
- ✅ No Placeholder SQL

CRITICAL RULE

After EVERY migration:

1. Generate Migration
2. Run Migration
3. Audit Migration
4. Manual SQL Verify
5. Fix Issues
6. Re-Audit
7. Only Then Continue

Never generate Migration 001-010 together.

Never let Claude continue automatically.

Never trust generated SQL without manual verification.

END OF PART 3

Part 4 will cover:

- Complete Authentication Development System
- Supabase Auth
- OTP
- Google Login
- JWT
- Sessions
- Devices
- RBAC
- Role Switching
- Auth API Verification
- Security Audits
- Penetration Testing
- Production Auth Checklist

And that is where actual application backend development starts.

6/12/2026, 2:14:07 PM

part 4 , do not skip anything, do not miss anything

6/12/2026, 2:16:07 PM

PART 4 - COMPLETE AUTHENTICATION DEVELOPMENT SYSTEM

IMPORTANT

Part 4 se actual application backend development start hoti hai.

Agar Authentication galat ban gaya:

✗ Property module fail

✗ CRM fail

✗ Payments fail

✗ Admin fail

✗ RBAC fail

✗ Security fail

Isliye Auth module ko "feature" mat samajhna.

Ye poore platform ki foundation hai.

Blueprint me bhi Authentication, Users, Sessions, Devices, Roles, Permissions, RBAC complete define kiya gaya hai. [Part 10 - Complete API Contract.pdf](#)

AUTH DEVELOPMENT ORDER

Never do:

Login Page

↓

Register Page

↓

Done

Wrong.

Correct:

```
Database
↓
Auth APIs
↓
JWT
↓
Sessions
↓
Devices
↓
RBAC
↓
Frontend
↓
Testing
↓
Security Audit
```

SECTION 1 - AUTH MASTER PROMPT

First Auth Prompt.

Claude:

```
Read Blueprint Part 1
Read Part 9A Database
Read Part 10A APIs
Read Feature Registry

Generate Authentication Module only.

Include:

Register

Login
```

OTP

Google Login

Email Verification

Password Reset

Sessions

Devices

JWT

RBAC

Role Switching

Frontend

Backend

Database Integration

Validation

Testing

Analytics

Audit Logs

After generation perform:

Security Audit

Feature Audit

UX Audit

Production Audit

Do not generate Property Module.

Based on Part 10A API contract. [Part 10 - Complete API Contract.pdf](#)

SECTION 2 - REGISTER SYSTEM

Blueprint supports:

Email

Mobile

Google

[Part 1 to 8.pdf](#)

REGISTER FLOW

Expected:

```
graph TD
    A[Select Role] --> B[Enter Name]
    B --> C[Enter Email]
    C --> D[Enter Mobile]
    D --> E[Enter Password]
    E --> F[Verify Mobile OTP]
    F --> G[Verify Email]
    G --> H[Create Account]
    H --> I[Profile Setup]
    I --> J[Dashboard]
```

REGISTER PROMPT

Generate Register System.

Implement:

Frontend

Backend

Validation

Database Persistence

Analytics

Audit Logs

OTP Integration

Email Verification

Role Selection

No mock implementation.

VERIFY REGISTER

Manual Test.

Create:

Buyer

Broker

Builder

Agency

Check:

Database:

```
select *  
from users;
```

Verify:

User created.

Check:

```
select *  
from user_roles;
```

Role assigned.

Check:

```
select *  
from audit_logs;
```

Registration logged.

REGISTER AUDIT PROMPT

Audit Registration Flow.

Check:

Validation

OTP

Email Verification

Role Assignment

Database Persistence

Audit Logging

Analytics Events

Generate report.

SECTION 3 - OTP SYSTEM

Blueprint requires OTP. [Part 10 - Complete API Contract.pdf](#)

OTP RULES

Must support:

Mobile OTP

Email OTP

OTP SECURITY

Must include:

5 Minutes Expiry

Max 5 Attempts

Rate Limiting

Replay Protection

Brute Force Protection

OTP PROMPT

Generate OTP System.

Implement:

Send OTP

Verify OTP

Expiry

Attempt Limits

Rate Limits

Security Logs

Audit Logs

Generate tests.

VERIFY OTP

Manual.

Send OTP.

Wait 6 minutes.

Verify:

Rejected.

Try:

6 wrong OTP.

Verify:

Blocked.

Check:

```
select *  
from otp_requests;
```

SECTION 4 - LOGIN SYSTEM

Blueprint supports:

Email Login

Mobile Login

Google Login

Part 10 – Complete API Contract.pdf

LOGIN FLOW

Login

↓

Validate Credentials

↓

Create Session

↓

Generate JWT

↓

Register Device

↓

Dashboard

LOGIN PROMPT

Generate Login System.

Implement:

Email Login

Mobile Login

Google Login

JWT

Refresh Token

Session Creation

Device Tracking

Audit Logging

Analytics Events

Security Logging

VERIFY LOGIN

Login.

Check:

```
select *  
from user_sessions;
```

Session created.

Check:

```
select *  
from user_devices;
```

Device created.

Check:

```
select *  
from security_logs;
```

Login logged.

SECTION 5 - JWT SYSTEM

Never trust frontend.

Everything must validate JWT.

JWT RULES

Access Token

1 Hour

Refresh Token

30 Days

JWT PROMPT

Generate JWT Architecture.

Implement:

Access Token

Refresh Token

Rotation

Revocation

Expiry

Validation

Security Audit

VERIFY JWT

Login.

Copy JWT.

Modify token.

Call API.

Must fail.

SECTION 6 - GOOGLE LOGIN

Prompt:

Generate Google Login.

Implement:

Google OAuth

Account Linking

Role Assignment

Existing User Mapping

Audit Logs

Analytics

VERIFY

Google Login.

Check:

No duplicate users.

SECTION 7 - EMAIL VERIFICATION

Prompt:

Generate Email Verification System.

Implement:

Verification Token

Verification Email

Resend Verification

Expiry

Audit Logs

VERIFY

Unverified user.

Login.

Check restrictions.

Verify:

Email marked:

```
email_verified=true
```

SECTION 8 - PASSWORD RESET

Prompt:

Generate Password Reset System.

Implement:

Forgot Password

Reset Token

Expiry

Password Update

Audit Logging

Security Logging

VERIFY

Reset password.

Old password:

Fail.

New password:

Success.

SECTION 9 - SESSION MANAGEMENT

Blueprint defines sessions. `Part 10 - Complete API Contract.pdf`

SESSION FEATURES

Active Sessions

Session Revoke

Revoke All

Device Tracking

PROMPT

Generate Session Management.

Implement:

List Sessions

Terminate Session

Terminate All Sessions

Audit Logs

Security Logs

VERIFY

Login 3 browsers.

Check:

```
select *  
from user_sessions;
```

3 sessions.

Revoke one.

Only one removed.

SECTION 10 - DEVICE MANAGEMENT

Prompt:

```
Generate Device Management.
```

```
Implement:
```

```
Trusted Device
```

```
Device Listing
```

```
Device Removal
```

```
Last Used Tracking
```

```
Audit Logs
```

VERIFY

Login.

Device appears.

Remove device.

Access removed.

SECTION 11 - ROLE SWITCHING

Blueprint supports multi-role accounts. [Part 1 to 8.pdf](#)

Example:

Buyer
+
Broker

One account.

PROMPT

Generate Role Switching System.

Implement:

Role Assignment

Role Switching

Permission Refresh

Session Refresh

Audit Logs

VERIFY

Buyer

↓

Switch Broker

↓

Broker Dashboard

Must open.

SECTION 12 - RBAC

Most critical.

ROLES

Buyer

Broker

Builder

Agency

Admin

Super Admin

RBAC PROMPT

Generate RBAC System.

Implement:

Roles

Permissions

Permission Checks

API Authorization

Page Authorization

Menu Authorization

Button Authorization

VERIFY

Broker:

Cannot access:

Feature Flags

System Monitoring

Platform Settings

Admin:

Cannot access:

Tenant Management

Only Super Admin.

SECTION 13 - AUTH ANALYTICS

Track:

Registration

Login

Logout

Password Reset

Role Switch

Verification

PROMPT

Generate Authentication Analytics.

Track all authentication events.

Store analytics records.

Generate dashboard metrics.

VERIFY

Login.

Analytics event created.

SECTION 14 - AUTH AUDIT LOGS

Track:

Register

Login

Logout

Password Change

Password Reset

Role Switch

Device Remove

Session Revoke

VERIFY

Check:

```
select *  
from audit_logs;
```

Events logged.

SECTION 15 - FRONTEND AUTH PAGES

Generate only after backend complete.

Pages:

```
Login  
  
Register  
  
Forgot Password  
  
Reset Password  
  
Verify Email  
  
Verify Mobile  
  
Select Role
```

Blueprint defines these pages. [Part 11 – Complete UI UX Wireframes.pdf](#)

PROMPT

```
Generate Auth UI.  
  
Implement:  
  
Desktop  
  
Tablet  
  
Mobile
```

Accessibility

Dark Mode Ready

SEO Ready

Validation

Loading States

Error States

Success States

Empty States

VERIFY

Every button works.

No fake links.

SECTION 16 - SECURITY AUDIT

Prompt:

Act as Senior Security Engineer.

Audit Authentication.

Check:

JWT

Sessions

Devices

Passwords

Rate Limits

OTP

Google Login

RBAC

Generate vulnerabilities.

SECTION 17 - CUSTOMER ATTACK TEST

Prompt:

Pretend you are a malicious user.

Try:

OTP Abuse

Session Abuse

Role Escalation

JWT Manipulation

Password Reset Abuse

Device Abuse

Generate report.

SECTION 18 - PRODUCTION READINESS AUDIT

Prompt:

Review Authentication Module.

Detect:

Missing Features

Broken Flows

Security Problems

Database Risks

Session Risks

RBAC Risks

Generate report.

SECTION 19 - AUTH ACCEPTANCE CHECKLIST

Do NOT start Property Module until:

- ✓ Register Works
- ✓ Login Works
- ✓ OTP Works
- ✓ Email Verification Works
- ✓ Password Reset Works
- ✓ JWT Works
- ✓ Sessions Work
- ✓ Devices Work
- ✓ RBAC Works
- ✓ Role Switching Works
- ✓ Analytics Logged
- ✓ Audit Logs Logged
- ✓ Security Audit Passed
- ✓ Customer Attack Audit Passed
- ✓ Mobile Responsive
- ✓ No Mock Data

- ✓ No TODO
 - ✓ No Placeholder
 - ✓ No Fake Button
-

CRITICAL RULE

Before moving to Property Module:

Create 6 test accounts:

Buyer

Broker

Builder

Agency

Admin

Super Admin

Login each.

Test permissions manually.

Only after that start Part 5 (Property Module).

END OF PART 4

Part 5 will be the largest module in the entire project:

- Property CRUD
- Property Media
- Property Search
- AI Search
- Voice Search
- Favorites

- Compare
- Saved Searches
- Price Alerts
- Geo Verification
- SEO
- Analytics
- Property APIs
- Property UI
- Property Verification
- Property Audit System

and it will be roughly 2-3x larger than the Auth module.

6/12/2026, 2:16:09 PM

part 5 do not skip anything, do not miss anything

6/12/2026, 2:17:25 PM

PART 5 - COMPLETE PROPERTY MODULE DEVELOPMENT SYSTEM

IMPORTANT

Ye pura SaaS ka core module hai.

Agar Property Module perfect nahi bana:

- ✗ Search fail
- ✗ Leads fail
- ✗ CRM fail
- ✗ Analytics fail
- ✗ Revenue fail
- ✗ SEO fail
- ✗ AI Search fail
- ✗ Voice Search fail

Basically poori website fail.

Blueprint me bhi Property Module ko core engine bola gaya hai. [Part 1 to 8.pdf](#)

PROPERTY MODULE DEVELOPMENT ORDER

Kabhi bhi:

Property Page

↓

Done

Mat karna.

Correct Order:

```
Database
↓
APIs
↓
Media
↓
Search
↓
SEO
↓
Analytics
↓
Favorites
↓
Compare
↓
Alerts
↓
AI Search
↓
Voice Search
↓
Frontend
↓
Testing
↓
Audit
```

SECTION 1 - PROPERTY MASTER PROMPT

Claude ko ye prompt do.

Read:

Blueprint Part 1

Part 2

Part 9 Property Schema

Part 10 Property APIs

Part 11 Property UI

Feature Registry

Generate Property Module only.

Implement:

Property CRUD

Media

Documents

Location

Amenities

Pricing

SEO

Analytics

Favorites

Compare

Saved Searches

Price Alerts

AI Search

Voice Search

Geo Verification

Frontend

Backend

Database Integration

Validation

Tests

Audit Logs

Analytics

After generation perform:

Feature Audit

SEO Audit

Security Audit

Production Audit

Do not generate Project Module.

SECTION 2 - PROPERTY OBJECT ARCHITECTURE

Blueprint property object contains: `Part 10 - Complete API Contract.pdf`

Property:

Basic Information

Details

Area

Pricing

Location

Amenities

Media

Documents

SEO

Analytics

VERIFY

One property must contain:

1 Pricing

1 Location

Many Images

Many Documents

Many Amenities

SECTION 3 - PROPERTY CREATE FLOW

Blueprint flow. [Part 1 to 8.pdf](#)

Flow:

Select Property Type

↓

Select Listing Type

↓

Property Details

↓

Upload Images
↓
Upload Documents
↓
Map Location
↓
Preview
↓
Submit
↓
Admin Review
↓
Publish

PROPERTY CREATE PROMPT

Generate Property Creation System.

Implement:

Frontend

Backend

Validation

Media Upload

Document Upload

Location Mapping

Preview

Draft Save

Final Submit

Audit Logs

Analytics

Generate tests.

VERIFY CREATE

Create property.

Check:

properties

Record created.

Check:

property_details

Created.

Check:

property_location

Created.

Check:

property_pricing

Created.

If one missing:

Reject.

SECTION 4 - PROPERTY EDIT

Prompt:

Generate Property Edit System.

Implement:

Update

Version Tracking

Draft Save

Audit Logs

Analytics

VERIFY

Edit title.

Check database updated.

Edit price.

Check:

Price updated.

Audit created.

SECTION 5 - PROPERTY DELETE

Never hard delete.

Prompt:

Generate Property Delete System.

Implement:

Soft Delete

Restore

Audit Logs

Permissions

VERIFY

Delete property.

Check:

deleted_at

Filled.

Not removed.

SECTION 6 - PROPERTY MEDIA SYSTEM

Blueprint media rules. [Part 1 to 8.pdf](#)

Supports:

Images

Videos

Floor Plans

Documents

Brochures

Virtual Tours

MEDIA PROMPT

Generate Media System.

Implement:

Upload

Compression

WebP

AVIF

Watermark

Virus Scan

Duplicate Detection

Quality Validation

Signed URLs

VERIFY

Upload image.

Check:

Compressed.

Upload duplicate.

Reject.

Upload blurry.

Reject.

SECTION 7 - PROPERTY LOCATION SYSTEM

Blueprint. Part 1 to 8.pdf

Store:

Country

State

District

City

Locality

Society

Address

Pincode

Latitude

Longitude

PROMPT

Generate Property Location System.

Implement:

Address

Coordinates

Maps

Geocoding

Reverse Geocoding

Validation

VERIFY

Open property.

Map pin correct.

Coordinates stored.

SECTION 8 - PROPERTY AMENITIES

Prompt:

Generate Amenities System.

Implement:

Master Amenities

Amenity Mapping

Search Filters

Admin Management

VERIFY

Add amenity.

Search amenity.

Result appears.

SECTION 9 - PROPERTY SEARCH

Most important.

Blueprint search architecture. [Part 1 to 8.pdf](#)

Search Types:

Keyword

Location

Map

AI

Voice

Polygon

Nearby

SEARCH PROMPT

Generate Search Engine.

Implement:

Keyword Search

Location Search

Map Search

Autocomplete

Recent Searches

Saved Searches

Search Analytics

VERIFY

Search:

2 BHK Rajkot

Result correct.

Search speed:

Under 1 second.

SECTION 10 - AI SEARCH

Blueprint AI Search. `Part 1 to 8.pdf`

Example:

2 BHK Rajkot under 50 lakh

System extracts:

City

BHK

Price

PROMPT

Generate AI Search.

Implement:

Natural Language Parsing

Filter Extraction

Property Search

Analytics

Usage Tracking

Cost Tracking

Audit Logs

VERIFY

Query:

Plot near Ring Road under 25 lakh

Filters extracted correctly.

SECTION 11 - VOICE SEARCH

Blueprint. `Part 1 to 8.pdf`

Languages:

English

Hindi

Gujarati

PROMPT

Generate Voice Search.

Implement:

Speech To Text

Filter Extraction

Search Execution

Analytics

VERIFY

Gujarati search.

Works.

Hindi search.

Works.

SECTION 12 - FAVORITES SYSTEM

Prompt:

Generate Favorites System.

Implement:

Save Property

Remove Property

Lists

Shortlists

Analytics

VERIFY

Save property.

Database updated.

Remove.

Database updated.

SECTION 13 - COMPARE SYSTEM

Blueprint compare. `Part 1 to 8.pdf`

Compare:

Price

Area

Amenities

Builder

BHK

PROMPT

Generate Property Comparison System.

Implement:

Add

Remove

Compare

Plan Limits

Analytics

VERIFY

Compare 3 properties.

Table accurate.

SECTION 14 - SAVED SEARCHES

Prompt:

Generate Saved Search System.

Implement:

Save Filters

Notifications

Management

Analytics

VERIFY

Save search.

New property matches.

Alert sent.

SECTION 15 - PRICE ALERTS

Prompt:

Generate Price Drop Alerts.

Implement:

Tracking

Notifications

Email

SMS

WhatsApp

Push

VERIFY

Reduce price.

Alert triggered.

SECTION 16 - GEO VERIFICATION

Blueprint. [Part 1 to 8.pdf](#)

Purpose:

Fake property reduction.

PROMPT

Generate Geo Verification.

Implement:

GPS Validation

Distance Checks

Verification Badge

Audit Logs

VERIFY

Far location.

Reject.

Near location.

Approve.

SECTION 17 - PROPERTY ANALYTICS

Track:

Views

Clicks

Calls

WhatsApp

Leads

Visits

Favorites

Shares

PROMPT

Generate Property Analytics.

Track all user actions.

Create dashboard metrics.

VERIFY

Open property.

Analytics event created.

SECTION 18 - PROPERTY SEO

Most important.

SEO PROMPT

Generate Property SEO System.

Implement:

Slug

Meta Title

Meta Description

Canonical

Schema

Open Graph

Twitter Cards

Sitemap

VERIFY

Property page source.

Check:

title

meta

schema

canonical

Exists.

SECTION 19 - PROPERTY APIs

Blueprint APIs. [Part 10 - Complete API Contract.pdf](#)

Required:

Create

Update

Delete

Detail

List

Search

AI Search

Media

Analytics

API PROMPT

Generate Property APIs.

Implement:

Validation

RBAC

Rate Limits

Audit Logs

Analytics

OpenAPI Documentation

VERIFY

Every API.

Postman test.

SECTION 20 - PROPERTY FRONTEND

Blueprint screens. [Part 11 - Complete UI UX Wireframes.pdf](#)

Pages:

Property Listing

Property Detail

Create Property

Edit Property

Compare

Saved

PROMPT

Generate Property UI.

Implement:

Desktop

Tablet

Mobile

Dark Mode

Accessibility

SEO

Loading

Error

Success

Empty States

VERIFY

Every screen.

Responsive.

No overflow.

SECTION 21 - PROPERTY AUDIT

Prompt:

Audit Property Module.

Check:

Every Button

Every Card

Every Filter

Every Search

Every Form

Every Dropdown

Every API

Every Database Relation

Generate report.

SECTION 22 - CUSTOMER ATTACK TEST

Prompt:

Pretend you are a user.

Try:

Fake Listings

Spam Uploads

Broken Searches

Duplicate Properties

Image Abuse

Filter Abuse

Generate report.

SECTION 23 - PROPERTY ACCEPTANCE CHECKLIST

Before Project Module:

- ✓ Property Create
- ✓ Property Edit
- ✓ Property Delete
- ✓ Media
- ✓ Documents
- ✓ Location
- ✓ Amenities
- ✓ Search
- ✓ AI Search
- ✓ Voice Search

- ✓ Favorites
- ✓ Compare
- ✓ Saved Searches
- ✓ Price Alerts
- ✓ Geo Verification
- ✓ Analytics
- ✓ SEO
- ✓ APIs
- ✓ Responsive UI
- ✓ Security Audit Passed
- ✓ Customer Attack Audit Passed
- ✓ No TODO
- ✓ No Mock Data
- ✓ No Placeholder
- ✓ No Fake Button

CRITICAL RULE

Before starting Part 6:

Create:

10 Properties

5 Cities

20 Searches

5 Favorites

3 Comparisons

2 Alerts

Test everything manually.

Only after that move to Project Module.

END OF PART 5

Part 6 (Project + Builder + Inventory Module) will be the second-largest business module after Property and includes:

- Builders
- Projects
- Towers
- Floors
- Units
- Inventory
- RERA
- Brochures
- Floor Plans
- Construction Updates
- Site Visits
- Project SEO
- Project Analytics
- Builder Pages
- Builder Dashboard
- Inventory Management
- Project Audits

and is deeply connected with Builder accounts, leads, CRM and future sales workflows.

6/12/2026, 2:17:27 PM

part 6 do not skip anything do not miss anything

6/12/2026, 2:19:10 PM

PART 6 — COMPLETE PROJECT, BUILDER, INVENTORY & NEW PROJECT LAUNCH MODULE

IMPORTANT

Property Module aur Project Module same nahi hai.

Most developers ye galti karte hai.

Property

Individual Property

Example:

2 BHK Flat
Rajkot
Ready To Move

Project

Builder Project

Example:

Shiv Heights

Builder:
ABC Developers

3 Towers

240 Units

Under Construction

Project Module is connected with:

Builders
Inventory
Towers
Floors
Units
CRM
Site Visits
Leads
Payments
SEO
Analytics

Agar Project Module galat bana:

- ✗ Builder Dashboard fail
- ✗ Inventory fail
- ✗ CRM fail
- ✗ Site Visit fail
- ✗ New Project Launch fail
- ✗ RERA fail
- ✗ Project SEO fail

PROJECT DEVELOPMENT ORDER

Never:

Project Page
↓
Done

Wrong.

Correct:

```
Builder
↓
Project
↓
Tower
↓
Floor
↓
Unit
↓
Inventory
↓
Media
↓
Brochure
↓
Floor Plan
↓
Construction Updates
↓
Site Visits
↓
Leads
↓
Analytics
↓
SEO
↓
Frontend
↓
Audit
```

SECTION 1 — MASTER PROJECT PROMPT

Claude Prompt:

Read :

Blueprint
Feature Registry
Project Database Schema
Project APIs
Project UI

Generate Project Module only.

Implement:

Builders

Projects

Towers

Floors

Units

Inventory

Media

Brochures

Floor Plans

Construction Updates

Site Visits

Project SEO

Project Analytics

Lead Integration

CRM Integration

Audit Logs

Analytics

Validation

Testing

Perform:

Feature Audit

SEO Audit

Security Audit

Production Audit

Do not generate CRM Module.

SECTION 2 — BUILDER MODULE

Before Project.

Builder must exist.

Builder Fields

Builder Name

Builder Slug

Company Name

Description

Logo

Cover Image

Founded Year

Website

Email

Mobile

Address

Cities Served

Projects Count

RERA Details

Social Links

SEO

BUILDER PROMPT

Generate Builder Module.

Implement:

Create

Update

Delete

Verification

SEO

Analytics

Project Relations

Audit Logs

VERIFY

Create Builder.

Database:

builders

Record exists.

Builder Page opens.

SEO created.

SECTION 3 — PROJECT MODULE

Core Entity.

Project Fields

Project Name

Slug

Builder

Project Type

Status

Description

Highlights

Amenities

Possession Date

Launch Date

Address

Coordinates

RERA

SEO

PROJECT CREATE FLOW

Preview

↓

Publish

PROJECT PROMPT

Generate Project Creation System.

Implement:

Draft Save

Preview

Publish

Validation

SEO

Analytics

Audit Logs

VERIFY

Create Project.

Check:

projects

Created.

Builder relation exists.

Location exists.

SEO exists.

SECTION 4 — TOWER SYSTEM

Example:

Shiv Heights

Tower A

Tower B

Tower C

PROMPT

Generate Tower Management.

Implement:

Create

Update

Delete

Ordering

Analytics

Audit Logs

VERIFY

Project

Tower A

Saved

Tower B

Saved

SECTION 5 — FLOOR SYSTEM

Example:

Tower A

Ground

1

2

3

4

5

PROMPT

Generate Floor Management.

Implement:

Create

Update

Delete

Floor Ordering

Relations

VERIFY

Tower

↓

Floor

↓

Saved

SECTION 6 — UNIT SYSTEM

Most important.

Example:

Tower A

Floor 4

Unit 401

Unit 402

Unit 403

Unit Fields:

Unit Number

BHK

Area

Price

Facing

Status

Floor

Tower

PROMPT

Generate Unit Management.

Implement:

Create

Update

Delete

Availability

Pricing

Relations

VERIFY

Unit created.

Floor relation exists.

Tower relation exists.

Project relation exists.

SECTION 7 — INVENTORY SYSTEM

Most critical for Builders.

Inventory Status:

Available

Booked

Sold

Blocked

Reserved

PROMPT

Generate Inventory System.

Implement :

Availability Tracking

Inventory Dashboard

Status Updates

Audit Logs

Analytics

VERIFY

Mark unit sold.

Inventory updates.

Mark available.

Inventory updates.

SECTION 8 — PROJECT MEDIA

Supports:

Images

Videos

Master Plan

Site Images

Construction Images

Virtual Tour

PROMPT

Generate Project Media System.

Implement:

Upload

Compression

Validation

Watermark

Signed URLs

VERIFY

Upload.

Media linked to project.

SECTION 9 — BROCHURE SYSTEM

Supports:

PDF

Project Brochure

Price Sheet

Master Plan

PROMPT

Generate Brochure Management.

Implement:

Upload

Download

Versioning

Audit Logs

VERIFY

Upload PDF.

Download works.

Version update works.

SECTION 10 — FLOOR PLAN SYSTEM

Important.

Supports:

1 BHK

2 BHK

3 BHK

4 BHK

Plans.

PROMPT

Generate Floor Plan System.

Implement:

Upload

Categorization

Preview

Download

Analytics

VERIFY

Floor Plan linked.

Correct BHK category.

SECTION 11 — RERA SYSTEM

Very important.

Fields:

RERA Number

Registration Date

Expiry Date

Certificate

Status

PROMPT

Generate RERA Module.

Implement:

Validation

Verification

Certificate Upload

Expiry Tracking

VERIFY

Expired RERA.

Warning shown.

SECTION 12 — CONSTRUCTION UPDATES

Example:

Foundation

Completed

Tower A

10th Floor Completed

Possession Ready

PROMPT

Generate Construction Updates.

Implement:

Timeline

Media

Notifications

Audit Logs

VERIFY

Update appears.

Users notified.

SECTION 13 — SITE VISIT SYSTEM

Huge lead conversion feature.

Flow:

```
Book Visit
↓
Assign Executive
↓
Schedule
↓
Visit
↓
Feedback
↓
CRM
```

PROMPT

Generate Site Visit System.

Implement:

Booking

Scheduling

Assignment

Attendance

Feedback

CRM Integration

Notifications

VERIFY

Visit booked.

CRM updated.

SECTION 14 — PROJECT LEADS

Project leads must connect CRM.

PROMPT

Generate Project Lead Integration.

Implement:

Lead Capture

Assignment

CRM Sync

Analytics

Audit Logs

VERIFY

Lead submitted.

CRM lead created.

SECTION 15 — BUILDER PROFILE PAGE

Public Page.

Contains:

Builder Info

Projects

Ratings

Reviews

Contact

SEO

PROMPT

Generate Builder Public Page.

Implement:

SEO

Projects

Analytics

Lead Capture

VERIFY

Projects visible.

SEO generated.

SECTION 16 — PROJECT DETAIL PAGE

Most visited page.

Contains:

Overview

Amenities

Location

Floor Plans

Brochure

Inventory

Builder

Construction Updates

Contact

Site Visit

PROMPT

Generate Project Detail Page.

Implement:

Desktop

Tablet

Mobile

SEO

Analytics

Lead Capture

VERIFY

Every tab works.

Every button works.

No fake action.

SECTION 17 — PROJECT SEARCH

Search:

Project Name

Builder

City

Location

RERA

Status

PROMPT

Generate Project Search Engine.

Implement:

Filters

Sorting

Autocomplete

Analytics

VERIFY

Search under 1 second.

SECTION 18 — PROJECT ANALYTICS

Track:

Views

Brochure Downloads

Floor Plan Views

Site Visits

Leads

Calls

WhatsApp

PROMPT

Generate Project Analytics.

Track all actions.

Create dashboards.

VERIFY

Events stored.

Analytics visible.

SECTION 19 — PROJECT SEO

Most important.

PROMPT

Generate Project SEO System.

Implement:

Slug

Meta

Schema

Canonical

Open Graph

Twitter Cards

Sitemap

VERIFY

View Source.

Check:

```
title
meta
schema
canonical
```

Exists.

SECTION 20 — BUILDER DASHBOARD

Builder sees:

Projects

Inventory

Leads

Site Visits

Analytics

Media

PROMPT

Generate Builder Dashboard.

Implement:

Analytics

Inventory

Leads

Projects

Site Visits

Notifications

VERIFY

Builder only sees own projects.

SECTION 21 — PROJECT AUDIT

Prompt:

Audit Project Module.

Check:

Every Button

Every Tab

Every Form

Every Search

Every Filter

Every Relation

Every API

Generate report.

SECTION 22 — CUSTOMER ATTACK TEST

Prompt:

Pretend you are a Builder.

Try:

Duplicate Projects

Fake RERA

Broken Inventory

Media Abuse

Lead Abuse

Generate report.

SECTION 23 — PROJECT ACCEPTANCE CHECKLIST

Before CRM Module:

☒ Builder Module

☒ Project Module

- ✓ Towers
- ✓ Floors
- ✓ Units
- ✓ Inventory
- ✓ Brochures
- ✓ Floor Plans
- ✓ RERA
- ✓ Construction Updates
- ✓ Site Visits
- ✓ Leads
- ✓ Search
- ✓ Analytics
- ✓ SEO
- ✓ Builder Dashboard
- ✓ Responsive UI
- ✓ Security Audit Passed
- ✓ Customer Attack Audit Passed
- ✓ No TODO
- ✓ No Placeholder
- ✓ No Mock Data
- ✓ No Fake Buttons

CRITICAL RULE

Before Part 7:

Create test data:

3 Builders

10 Projects

20 Towers

100 Floors

500 Units

50 Site Visits

100 Leads

Then manually verify:

- Inventory
- Site Visits
- Builder Dashboard
- Project Search
- SEO Pages

Only after that move to CRM Module.

END OF PART 6

Part 7 will cover the complete CRM Engine:

- Leads
- Lead Assignment
- Lead Routing
- Lead Scoring
- Pipeline
- Kanban
- Follow-ups
- Tasks
- Notes

- Activities
- Visits
- Automation
- WhatsApp CRM
- Email CRM
- Broker CRM
- Builder CRM
- CRM Analytics
- CRM Audit System

This is the heart of monetization and sales operations.

6/12/2026, 2:19:12 PM

part 7 do not miss anything do not skip anything

6/12/2026, 2:20:13 PM

PART 7 — COMPLETE CRM ENGINE (LEADS, PIPELINE, FOLLOWUPS, AUTOMATION, SALES OPERATIONS)

IMPORTANT

Aapki Real Estate SaaS me CRM sirf ek feature nahi hai.

CRM = Revenue Engine.

Agar CRM strong hai:

- ✓ Leads convert honggi
- ✓ Brokers kaam karenge
- ✓ Builders renew karenge
- ✓ Subscription bikenge
- ✓ Site visits increase honggi

Agar CRM weak hai:

- ✗ Leads lost
- ✗ Followup miss
- ✗ Revenue loss
- ✗ Builders churn
- ✗ Brokers leave platform

CRM DEVELOPMENT ORDER

PROMPT

Generate Lead Management System.

Implement:

Create

Update

Delete

Merge

Convert

Duplicate Detection

Analytics

Audit Logs

VERIFY

Create Lead.

Database:

leads

Created.

Edit lead.

Updated.

Merge duplicate.

Works.

SECTION 3 — LEAD ASSIGNMENT

Very important.

Flow:

```
graph TD;
  Lead --> Assign_Broker[Assign Broker];
  Assign_Broker --> Broker_Receive[Broker Receives];
  Broker_Receive --> CRM_Updated[CRM Updated];
```

PROMPT

Generate Lead Assignment System.

Implement:

Manual Assignment

Bulk Assignment

Auto Assignment

Notifications

Analytics

Audit Logs

VERIFY

Assign lead.

Broker sees lead.

Audit logged.

SECTION 4 — LEAD ROUTING

Enterprise Feature.

Rules:

City

Project

Property Type

Budget

Builder

Broker Capacity

PROMPT

Generate Lead Routing Engine.

Implement:

Rule Based Routing

Fallback Routing

Priority Routing

Round Robin Routing

VERIFY

Rajkot lead.

Rajkot broker receives.

Ahmedabad lead.

Ahmedabad broker receives.

SECTION 5 — LEAD SCORING

Most SaaS skip this.

Huge mistake.

Factors:

Budget

Visits

Engagement

WhatsApp

Calls

Saved Properties

Project Views

PROMPT

Generate Lead Scoring System.

Implement:

Score Rules

Score Updates

Score History

Analytics

VERIFY

Lead views 20 properties.

Score increases.

SECTION 6 — PIPELINE

Standard Pipeline.

Stages:

New

Contacted

Qualified

Interested

Visit Scheduled

Visit Done

Negotiation

Booked

Closed Won

Closed Lost

PROMPT

Generate CRM Pipeline.

Implement:

Stage Movement

History

Analytics

Audit Logs

VERIFY

Move lead.

History stored.

Analytics updated.

SECTION 7 — KANBAN BOARD

Most important CRM screen.

Columns:

New

Contacted

Qualified

Visit

Negotiation

Won

Lost

PROMPT

Generate Kanban CRM.

Implement:

Drag Drop

Bulk Actions

Filters

Analytics

VERIFY

Drag card.

Stage updated.

Database updated.

SECTION 8 — FOLLOWUPS

Critical.

Types:

Call

WhatsApp

Email

Meeting

Site Visit

PROMPT

Generate Followup System.

Implement:

Scheduling

Reminders

Notifications

History

Analytics

VERIFY

Create followup.

Reminder triggered.

History stored.

SECTION 9 — TASK MANAGEMENT

Tasks:

Call Lead

Visit Lead

Document Collection

Property Match

Builder Meeting

PROMPT

Generate CRM Task System.

Implement:

Create

Assign

Update

Complete

Recurring Tasks

VERIFY

Assign task.

User sees task.

Complete task.

Status updated.

SECTION 10 — NOTES

Purpose:

Internal CRM notes.

PROMPT

Generate Lead Notes System.

Implement:

Create

Edit

Delete

Mentions

Audit Logs

VERIFY

Note added.

Visible.

Edited.

Updated.

SECTION 11 — ACTIVITIES

Track everything.

Activities:

Call

WhatsApp

Email

Visit

Stage Change

Assignment

PROMPT

Generate Activity Tracking.

Track all CRM actions.

Create timeline.

VERIFY

Timeline visible.

Events logged.

SECTION 12 — SITE VISIT CRM

Connected with Project Module.

Flow:

Lead

↓

Visit Booked

↓

Visit Done

↓

Feedback

↓

Pipeline Update

PROMPT

Generate Site Visit CRM.

Implement :

Scheduling

Attendance

Feedback

Conversion Tracking

VERIFY

Visit done.

Lead updated.

SECTION 13 — WHATSAPP CRM

Very important for India.

FEATURES

Templates

Broadcast

Reminders

Lead Messages

Automation

PROMPT

Generate WhatsApp CRM.

Implement:

Templates

Lead Messaging

Reminders

Automation

Analytics

VERIFY

Message sent.

History stored.

SECTION 14 — EMAIL CRM

Features:

Templates

Campaigns

Lead Emails

Automation

PROMPT

Generate Email CRM.

Implement:

Templates

Campaigns

Tracking

Automation

Analytics

VERIFY

Email sent.

Open tracked.

SECTION 15 — CRM AUTOMATION

Huge feature.

Examples:

New Lead

↓

Assign Broker

↓

Create Followup

↓

WhatsApp

↓

Reminder

PROMPT

Generate CRM Automation Engine.

Implement:

Triggers

Conditions

Actions

Scheduling

Execution Logs

VERIFY

Automation fires.

Logs created.

SECTION 16 — BROKER CRM

Broker sees:

My Leads

Tasks

Followups

Visits

Analytics

PROMPT

Generate Broker CRM Dashboard.

Implement:

Lead View

Task View

Visit View

Analytics

VERIFY

Broker only sees own leads.

SECTION 17 — BUILDER CRM

Builder sees:

Project Leads

Visits

Bookings

Conversions

PROMPT

Generate Builder CRM Dashboard.

Implement:

Lead Tracking

Visit Tracking

Booking Tracking

VERIFY

Builder sees only own project leads.

SECTION 18 — CRM ANALYTICS

Track:

Leads

Sources

Conversions

Visits

Won

Lost

Revenue

PROMPT

Generate CRM Analytics.

Create dashboards.

Track all CRM metrics.

VERIFY

Metrics match database.

SECTION 19 — CRM APIs

Required APIs:

Create Lead

Update Lead

Assign Lead

Move Stage

Create Followup

Create Task

Visit Booking

Analytics

PROMPT

Generate CRM APIs.

Implement:

RBAC

Validation

Rate Limits

Audit Logs

Analytics

VERIFY

Test all APIs.

Postman.

SECTION 20 — CRM UI

Pages:

Lead List

Lead Detail

Kanban

Tasks

Followups

Visits

Analytics

PROMPT

Generate CRM UI.

Implement:

Desktop

Tablet

Mobile

Accessibility

Loading

Error

Success

Empty States

VERIFY

Every screen responsive.

SECTION 21 — CRM AUDIT

Prompt:

Audit CRM Module.

Check:

Leads

Pipeline

Kanban

Tasks

Visits

Automation

Analytics

Every Button

Every Form

Every API

Generate report.

SECTION 22 — CUSTOMER ATTACK TEST

Prompt:

Pretend you are a broker.

Try:

Duplicate Leads

Fake Leads

Broken Assignment

Pipeline Abuse

Automation Abuse

Generate report.

SECTION 23 — CRM ACCEPTANCE CHECKLIST

Before Messaging Module:

- ✓ Lead Management
- ✓ Lead Sources
- ✓ Assignment
- ✓ Routing
- ✓ Scoring
- ✓ Pipeline
- ✓ Kanban
- ✓ Tasks
- ✓ Notes
- ✓ Activities
- ✓ Followups
- ✓ Site Visits
- ✓ WhatsApp CRM
- ✓ Email CRM
- ✓ Automation
- ✓ Broker CRM
- ✓ Builder CRM
- ✓ Analytics
- ✓ APIs
- ✓ Responsive UI
- ✓ Security Audit Passed

- ✅ Customer Attack Audit Passed
 - ✅ No TODO
 - ✅ No Placeholder
 - ✅ No Mock Data
 - ✅ No Fake Buttons
-

CRITICAL RULE

Before Part 8:

Create test data:

```
100 Leads

20 Followups

20 Tasks

50 Activities

10 Visits

5 Automation Rules
```

Then verify:

- Lead Assignment
- Lead Routing
- Kanban
- Automation
- Broker Dashboard
- Builder Dashboard
- CRM Analytics

Only after that start Messaging Module.

END OF PART 7

Part 8 will cover:

- Realtime Chat
- Conversations
- Attachments
- Presence
- Typing Indicators
- Notifications
- WhatsApp Integration
- Email Notifications
- Push Notifications
- In-App Notifications
- Notification Center
- Messaging Analytics
- Messaging Security
- Messaging Audit System

This module connects every role across the platform.

6/12/2026, 2:20:16 PM

part 8 do not skip anything do not miss anything

6/12/2026, 2:21:54 PM

PART 8 — COMPLETE MESSAGING, CHAT, NOTIFICATIONS & COMMUNICATION SYSTEM

IMPORTANT

Most Real Estate SaaS fail here.

Reason:

Lead generate ho gaya.

CRM me aa gaya.

But communication weak hai.

Result:

✗ Broker followup miss

✗ Builder response miss

✗ Site Visit miss

✗ Lead cold ho jata hai

✗ Revenue loss

Messaging Module connects:

Buyer

Seller

Broker

Builder

Agency

Admin

Support Team

Ye CRM aur Property Module ke beech ka bridge hai.

MESSAGING DEVELOPMENT ORDER

Messages

Attachments

Realtime Messaging

Presence

Typing Indicators

Notifications

Push Notifications

Email Notifications

WhatsApp Notifications

Notification Center

Messaging Analytics

Audit Logs

Security

Validation

Testing

Perform:

Feature Audit

Security Audit

Production Audit

Do not generate Payment Module.

SECTION 2 — CONVERSATION SYSTEM

Foundation.

Everything starts here.

Conversation Types

Buyer ↔ Broker

Buyer ↔ Builder

Broker ↔ Builder

Admin ↔ User

Support ↔ User

PROMPT

Generate Conversation System.

Implement:

Create Conversation

Archive Conversation

Close Conversation

Reopen Conversation

Conversation Metadata

Audit Logs

VERIFY

Create conversation.

Database:

conversations

Record exists.

Participants linked.

SECTION 3 — PARTICIPANT SYSTEM

Every conversation must have participants.

Fields

User

Role

Joined At

Last Seen

Muted

Blocked

PROMPT

Generate Conversation Participants System.

Implement:

Add Participant

Remove Participant

Mute

Block

Permissions

VERIFY

User added.

User removed.

Permissions enforced.

SECTION 4 — MESSAGE SYSTEM

Core entity.

Message Types

Text

Image

Document

Property Share

Project Share

Location

System Message

PROMPT

Generate Message System.

Implement:

Send

Edit

Delete

Reply

Forward

Reactions

Read Status

Delivered Status

VERIFY

Send message.

Database:

messages

Stored.

Edit works.

Delete works.

SECTION 5 — PROPERTY SHARING

Huge Real Estate Feature.

Example

Broker sends:

Property #123

Inside chat.

PROMPT

Generate Property Sharing.

Implement:

Property Cards

Project Cards

Share Tracking

Analytics

VERIFY

Property shared.

Clickable.

Analytics stored.

SECTION 6 — ATTACHMENT SYSTEM

Supported:

Images

PDF

DOCX

XLSX

Floor Plans

Brochures

PROMPT

Generate Attachment System.

Implement:

Upload

Preview

Download

Virus Scan

Compression

Validation

VERIFY

Upload PDF.

Preview works.

Download works.

Virus file blocked.

SECTION 7 — REALTIME SYSTEM

Most important.

Technology:

Supabase Realtime

PROMPT

Generate Realtime Messaging.

Implement:

Realtime Messages

Realtime Read Status

Realtime Typing

Realtime Presence

Realtime Notifications

VERIFY

Open two browsers.

Send message.

Appears instantly.

SECTION 8 — PRESENCE SYSTEM

Shows:

Online

Offline

Last Seen

PROMPT

Generate Presence System.

Implement:

Online Status

Offline Status

Last Seen

Visibility Controls

VERIFY

User online.

Status visible.

Logout.

Offline visible.

SECTION 9 — TYPING INDICATORS

Example:

Broker is typing...

PROMPT

Generate Typing Indicators.

Implement:

Realtime Typing

Timeout Handling

Visibility Rules

VERIFY

Typing appears.

Stops after timeout.

SECTION 10 — READ RECEIPTS

Statuses:

Sent

Delivered

Read

PROMPT

Generate Read Receipts.

Implement:

Delivery Tracking

Read Tracking

Realtime Updates

VERIFY

Read status updates.

Realtime.

SECTION 11 — NOTIFICATION ENGINE

Most important.

Notification Types

Lead Assigned

Message Received

Site Visit

Followup

Payment

Subscription

Property Approved

PROMPT

Generate Notification Engine.

Implement:

Creation

Delivery

Tracking

Read Status

Audit Logs

VERIFY

Notification created.

Read status updates.

SECTION 12 — IN-APP NOTIFICATIONS

Bell icon.

PROMPT

Generate In-App Notifications.

Implement:

Notification Feed

Read All

Mark Read

Delete

Pagination

VERIFY

Notifications visible.

Read works.

SECTION 13 — PUSH NOTIFICATIONS

For future mobile apps.

PROMPT

Generate Push Notification System.

Implement:

Token Storage

Push Sending

Tracking

Delivery Reports

VERIFY

Push delivered.

Tracked.

SECTION 14 — EMAIL NOTIFICATIONS

Events:

Lead

Visit

Payment

Subscription

Message

PROMPT

Generate Email Notification System.

Implement:

Templates

Sending

Tracking

Analytics

VERIFY

Email sent.

Opened.

Tracked.

SECTION 15 — WHATSAPP NOTIFICATIONS

India critical feature.

Events:

Lead

Visit

Reminder

Subscription

Invoice

PROMPT

Generate WhatsApp Notifications.

Implement:

Templates

Sending

Tracking

Delivery Reports

VERIFY

WhatsApp sent.

Delivered.

Tracked.

SECTION 16 — NOTIFICATION CENTER

Unified dashboard.

Contains:

Messages

Leads

Visits

Payments

Subscriptions

PROMPT

Generate Notification Center.

Implement:

Filtering

Grouping

Read Status

Search

VERIFY

All notification types visible.

SECTION 17 — MESSAGING ANALYTICS

Track:

Messages Sent

Messages Read

Attachments

Response Time

Active Conversations

PROMPT

Generate Messaging Analytics.

Create dashboards.

Track all messaging metrics.

VERIFY

Metrics match database.

SECTION 18 — MESSAGING SECURITY

Critical.

Rules:

Users see own conversations only

No cross-account access

Attachment validation

Rate limiting

Spam prevention

PROMPT

Act as Security Engineer.

Generate Messaging Security Layer.

Implement:

Permissions

Rate Limits

Spam Detection

Attachment Validation

RLS

VERIFY

User A cannot access User B messages.

SECTION 19 — MESSAGING UI

Screens

Conversation List

Chat Screen

Notification Center

Attachment Viewer

PROMPT

Generate Messaging UI.

Implement:

Desktop

Tablet

Mobile

Accessibility

Loading States

Error States

Success States

Empty States

VERIFY

Responsive.

No overflow.

No fake buttons.

SECTION 20 — MESSAGING APIs

Required APIs

Create Conversation

Send Message

Read Message

Upload Attachment

Notifications

Presence

PROMPT

Generate Messaging APIs.

Implement :

RBAC

Validation

Rate Limits

Audit Logs

VERIFY

Postman testing.

All APIs pass.

SECTION 21 — MESSAGING AUDIT

Prompt

Audit Messaging Module.

Check:

Conversations

Messages

Attachments

Realtime

Presence

Notifications

Every Button

Every API

Every Database Relation

Generate report.

SECTION 22 — CUSTOMER ATTACK TEST

Prompt

Pretend you are a malicious user.

Try:

Spam Messaging

Attachment Abuse

Conversation Hijacking

Notification Abuse

Rate Limit Abuse

Generate report.

SECTION 23 — MESSAGING ACCEPTANCE CHECKLIST

Before Payment Module:

- ✓ Conversations
- ✓ Participants
- ✓ Messages
- ✓ Property Sharing
- ✓ Project Sharing
- ✓ Attachments
- ✓ Realtime
- ✓ Presence
- ✓ Typing

- ✓ Read Receipts
- ✓ Notifications
- ✓ Push
- ✓ Email
- ✓ WhatsApp
- ✓ Notification Center
- ✓ Analytics
- ✓ APIs
- ✓ Responsive UI
- ✓ Security Audit Passed
- ✓ Customer Attack Audit Passed
- ✓ No TODO
- ✓ No Placeholder
- ✓ No Mock Data
- ✓ No Fake Buttons

CRITICAL RULE

Before Part 9:

Create test data:

50 Conversations

500 Messages

100 Attachments

50 Notifications

20 Email Notifications

20 WhatsApp Notifications

Manually verify:

- Realtime
- Read Receipts
- Presence
- Notifications
- Attachment Downloads
- Mobile Chat UI

Only after all pass move to Payment & Subscription Module.

END OF PART 8

Part 9 will be one of the most revenue-critical modules:

- Subscription Plans
- Memberships
- Razorpay
- Invoices
- GST
- Refunds
- Advertisement System
- Featured Listings
- Usage Limits
- Revenue Analytics
- Billing Dashboard
- Financial Audits
- Payment Security
- Plan Enforcement Engine

This is the module that actually generates revenue from brokers, builders and agencies.

6/12/2026, 2:21:58 PM

part 9 do not miss anything do not skip anything

6/12/2026, 2:23:41 PM

PART 9 — COMPLETE SUBSCRIPTION, BILLING, PAYMENTS, ADVERTISEMENT & REVENUE SYSTEM

IMPORTANT

Ye module directly revenue generate karega.

Agar Payment Module weak hua:

- ✗ Subscription revenue loss
- ✗ Builder plans fail
- ✗ Broker plans fail
- ✗ Advertisement revenue fail
- ✗ Featured listings fail
- ✗ GST problems
- ✗ Refund disputes
- ✗ Accounting mismatch

Status Active.

Cancel.

Status Cancelled.

Upgrade.

Plan changed.

SECTION 5 — TRIAL SYSTEM

Very important.

Example:

7 Day Trial

14 Day Trial

PROMPT

Generate Trial System.

Implement:

Trial Creation

Expiry

Conversion

Analytics

VERIFY

Trial ends.

Subscription expires.

SECTION 6 — USAGE TRACKING

Track:

Listings

Leads

Projects

Ads

Storage

Messages

PROMPT

Generate Usage Tracking Engine.

Implement:

Real Time Tracking

Limit Enforcement

Notifications

VERIFY

Usage updates.

Limit enforcement works.

SECTION 7 — RAZORPAY INTEGRATION

Primary Gateway.

Supports:

UPI

Cards

NetBanking

Wallets

PROMPT

Generate Razorpay Integration.

Implement:

Order Creation

Payment Verification

Webhook Processing

Audit Logs

VERIFY

Sandbox payment.

Success.

Database updated.

Webhook received.

SECTION 8 — PAYMENT SYSTEM

Core Transactions.

Fields

Amount

Gateway

Status

Reference

User

Invoice

PROMPT

Generate Payment System.

Implement:

Create

Verify

Fail

Retry

Refund

VERIFY

Payment success.

Stored.

Payment fail.

Stored.

SECTION 9 — BILLING SYSTEM

Contains:

Billing Address

GST

Company

Invoices

PROMPT

Generate Billing System.

Implement:

Billing Profiles

GST Validation

Invoice Data

VERIFY

Billing saved.

Invoice generated.

SECTION 10 — GST SYSTEM

India mandatory.

Fields

GSTIN

State

Tax %

Invoice Tax

PROMPT

Generate GST Engine.

Implement:

GST Calculation

GST Validation

GST Invoices

Reports

VERIFY

Tax calculated correctly.

Invoice correct.

SECTION 11 — INVOICE SYSTEM

Critical.

Invoice Contains:

Invoice Number

User

Plan

Amount

GST

Status

PROMPT

Generate Invoice System.

Implement:

PDF

Download

Email

Versioning

VERIFY

Invoice generated.

PDF opens.

SECTION 12 — REFUND SYSTEM

Important.

States

Requested

Approved

Rejected

Processed

PROMPT

Generate Refund System.

Implement :

Request

Approval

Processing

Tracking

VERIFY

Refund requested.

Status changes.

Payment updated.

SECTION 13 — ADVERTISEMENT SYSTEM

Major revenue source.

Ad Types

Banner

Homepage

Sidebar

Search Results

Project Page

Property Page

PROMPT

Generate Advertisement System.

Implement:

Booking

Scheduling

Targeting

Tracking

Analytics

VERIFY

Ad appears.

Schedule respected.

SECTION 14 — FEATURED LISTINGS

Huge Revenue Feature.

Types

Featured Property

Featured Project

Featured Builder

PROMPT

Generate Featured Listings.

Implement:

Boosting

Priority Sorting

Scheduling

Expiry

VERIFY

Featured item ranks higher.

Expiry works.

SECTION 15 — COUPON SYSTEM

Optional but recommended.

Types

Flat

Percentage

Trial Extension

PROMPT

Generate Coupon System.

Implement:

Apply

Validate

Track

Expire

VERIFY

Coupon applied.

Discount correct.

SECTION 16 — REVENUE ANALYTICS

Track:

MRR

ARR

Subscriptions

Refunds

Revenue

Churn

PROMPT

Generate Revenue Analytics.

Create dashboards.

Track all financial metrics.

VERIFY

Revenue matches payments.

SECTION 17 — FINANCE DASHBOARD

Admin view.

Contains:

Revenue

Refunds

Invoices

Subscriptions

Ads

PROMPT

Generate Finance Dashboard.

Implement:

Charts

Reports

Exports

VERIFY

Metrics accurate.

SECTION 18 — SUBSCRIPTION ENFORCEMENT

Most developers forget.

Example:

Starter Plan:

20 Listings

User:

21 Listings

Must fail.

PROMPT

Generate Subscription Enforcement Engine.

Implement:

Plan Limits

Usage Checks

Feature Blocking

VERIFY

Limits enforced.

SECTION 19 — PAYMENT SECURITY

Critical.

Must protect:

Payment Tampering

Webhook Abuse

Invoice Abuse

Refund Abuse

PROMPT

Act as Security Engineer.

Generate Payment Security Layer.

Implement:

Webhook Validation

Signature Verification

Rate Limits

Fraud Detection

VERIFY

Fake webhook rejected.

SECTION 20 — PAYMENT APIS

Required:

Plans

Subscriptions

Payments

Invoices

Refunds

Ads

PROMPT

Generate Payment APIs.

Implement:

RBAC

Validation

Rate Limits

Audit Logs

VERIFY

Postman tests pass.

SECTION 21 — PAYMENT UI

Pages

Pricing

Checkout

Billing

Invoices

Subscriptions

Ads

Featured Listings

PROMPT

Generate Payments UI.

Implement:

Desktop

Tablet

Mobile

Accessibility

Loading

Error

Success

Empty States

VERIFY

Responsive.

No broken checkout.

SECTION 22 — PAYMENT AUDIT

Prompt

Audit Payment Module.

Check:

Plans

Subscriptions

Payments

Invoices

Refunds

Ads

Featured Listings

Analytics

Every API

Every Button

Generate report.

SECTION 23 — FINANCIAL ATTACK TEST

Prompt

Pretend you are a malicious user.

Try:

Fake Payments

Webhook Abuse

Invoice Abuse

Refund Abuse

Plan Bypass

Generate report.

SECTION 24 — PAYMENT ACCEPTANCE CHECKLIST

Before Admin Module:

- ✓ Plans
- ✓ Feature Mapping
- ✓ Subscriptions
- ✓ Trials
- ✓ Usage Tracking
- ✓ Razorpay
- ✓ Payments
- ✓ Billing
- ✓ GST
- ✓ Invoices

- ✓ Enforcement Engine
- ✓ APIs
- ✓ Responsive UI
- ✓ Security Audit Passed
- ✓ Financial Attack Audit Passed
- ✓ No TODO
- ✓ No Placeholder
- ✓ No Mock Data
- ✓ No Fake Buttons

CRITICAL RULE

Before Part 10:

Create test data:

20 Plans

50 Subscriptions

100 Payments

50 Invoices

10 Refunds

20 Ads

10 Featured Listings

Manually verify:

- Subscription Limits
- Checkout
- Razorpay Webhooks
- Invoices
- Refunds
- Revenue Analytics

Only after all pass move to Admin & Moderation Module.

END OF PART 9

Part 10 will cover:

- Admin Panel
- User Moderation
- Property Moderation
- Project Moderation
- KYC

- CMS
- Support Tickets
- Content Management
- Analytics
- Audit Logs
- Operational Dashboard
- Reports
- Exports
- Moderation Workflows

This is the operational backbone of the platform.

6/12/2026, 2:23:45 PM

part 10 do not skip anything do not miss anything

6/12/2026, 2:25:07 PM

PART 10 — COMPLETE ADMIN PANEL, MODERATION, CMS, SUPPORT & OPERATIONS SYSTEM

IMPORTANT

Admin Panel ≠ Super Admin Panel

Most developers dono ko mix kar dete hain.

Big mistake.

Admin

Daily Operations

Handles:

Users

Properties

Projects

Leads

Support

KYC

Content

Reports

Super Admin

Platform Control

Handles:

Tenants

Feature Flags

Global Settings

Monitoring

Integrations

Permissions

Super Admin Part 11 me aayega.

SECTION 1 — MASTER ADMIN PROMPT

Claude Prompt

Read:

Blueprint

Feature Registry

Admin Database

Admin APIs

Admin UI

Generate Admin Module only.

Implement:

User Management

KYC

Property Moderation

Project Moderation

Lead Management

Subscription Management

Payment Management

CMS

Support Tickets

Reports

Analytics

Audit Logs

Validation

Testing

Perform:

Feature Audit

Security Audit

Operations Audit

Production Audit

Do not generate Super Admin Module.

SECTION 2 — ADMIN DASHBOARD

Main control center.

Widgets

Total Users

Total Properties

Total Projects

Total Leads

Revenue

Subscriptions

Support Tickets

Pending Approvals

PROMPT

Generate Admin Dashboard.

Implement:

Widgets

Charts

Reports

Filters

Exports

Realtime Metrics

VERIFY

Numbers match database.

No fake metrics.

SECTION 3 — USER MANAGEMENT

Core admin feature.

Actions

View User

Edit User

Suspend User

Activate User

Delete User

Reset Password

Role View

PROMPT

Generate User Management.

Implement:

Listing

Filtering

Search

Edit

Suspend

Activate

Audit Logs

VERIFY

Suspend user.

Login blocked.

Activate user.

Login works.

SECTION 4 — USER VERIFICATION

Verification Types

Email

Mobile

KYC

Business Verification

PROMPT

Generate User Verification Management.

Implement:

Approve

Reject

Review

History

Audit Logs

VERIFY

Verification updates correctly.

SECTION 5 — KYC MANAGEMENT

Critical.

Supported Roles

Broker

Builder

Agency

Documents

PAN

GST

Aadhaar

Business License

RERA

PROMPT

Generate KYC Module.

Implement:

Upload Review

Approve

Reject

Request Reupload

History Tracking

VERIFY

Approve KYC.

Badge visible.

Reject.

Reason stored.

SECTION 6 — PROPERTY MODERATION

Most important.

Admin Actions

Approve

Reject

Unpublish

Feature

Archive

PROMPT

Generate Property Moderation.

Implement:

Review Queue

Approval

Rejection

Bulk Actions

Notifications

Audit Logs

VERIFY

Approve property.

Visible publicly.

Reject property.

Owner notified.

SECTION 7 — PROJECT MODERATION

Same as property.

Actions

Approve

Reject

Feature

Archive

PROMPT

Generate Project Moderation.

Implement:

Review Queue

Approval

Notifications

Audit Logs

VERIFY

Project approved.

Public listing visible.

SECTION 8 — LEAD ADMIN

Admin oversight.

Can view:

Lead Sources

Lead Assignment

Conversions

Performance

PROMPT

Generate Admin Lead Management.

Implement :

Monitoring

Reporting

Exports

Analytics

VERIFY

Lead metrics match CRM.

SECTION 9 — SUBSCRIPTION MANAGEMENT

Admin controls subscriptions.

Actions

View

Upgrade

Downgrade

Cancel

Renew

PROMPT

Generate Subscription Management.

Implement:

Management

History

Audit Logs

Notifications

VERIFY

Subscription updates.

Billing updates.

SECTION 10 — PAYMENT MANAGEMENT

Admin Finance.

Actions

Payments

Refunds

Invoices

Transactions

PROMPT

Generate Payment Management.

Implement:

View

Refund

Tracking

Exports

VERIFY

Refund processed.

Invoice updated.

SECTION 11 — CMS SYSTEM

Very important.

Manage:

Homepage

About

Contact

Pricing

FAQ

Terms

Privacy

Blog

PROMPT

Generate CMS System.

Implement:

Pages

Blocks

SEO

Publishing

Versioning

VERIFY

Edit homepage.

Frontend updates.

Version history exists.

SECTION 12 — BLOG MANAGEMENT

SEO critical.

Actions

Create

Edit

Delete

Publish

Schedule

PROMPT

Generate Blog Management.

Implement:

Categories

Tags

SEO

Scheduling

VERIFY

Blog published.

SEO generated.

SECTION 13 — SUPPORT TICKETS

Critical.

Ticket Types

Technical

Billing

Property

Project

Account

PROMPT

Generate Support System.

Implement:

Ticket Creation

Assignment

Replies

Escalation

Resolution

VERIFY

Ticket created.

Assigned.

Resolved.

SECTION 14 — REPORTS SYSTEM

Exports.

Supported Reports

Users

Properties

Projects

Leads

Revenue

Subscriptions

PROMPT

Generate Reporting System.

Implement:

CSV

Excel

PDF

Filters

VERIFY

Export works.

Data accurate.

SECTION 15 — ANALYTICS DASHBOARD

Track:

Users

Traffic

Properties

Projects

Revenue

Subscriptions

Conversions

PROMPT

Generate Admin Analytics.

Create:

Charts

Funnels

Reports

Comparisons

VERIFY

Metrics match source data.

SECTION 16 — AUDIT LOGS

Most important admin feature.

Track:

User Changes

Property Actions

Project Actions

CMS Changes

Payments

Refunds

PROMPT

Generate Audit Log System.

Track every admin action.

Implement:

Search

Filters

Exports

VERIFY

Admin action logged.

History preserved.

SECTION 17 — NOTIFICATIONS

Admin receives:

New User

New Property

New Project

Payment

Refund

Support Ticket

PROMPT

Generate Admin Notifications.

Implement:

Realtime

Email

Dashboard

VERIFY

Notification delivered.

SECTION 18 — ROLE PERMISSIONS

Admin RBAC.

Roles

Support Admin

Content Admin

Finance Admin

Operations Admin

Full Admin

PROMPT

Generate Admin RBAC.

Implement:

Permissions

Page Access

Button Access

API Access

VERIFY

Support Admin cannot access Finance.

Finance Admin cannot access CMS.

SECTION 19 — ADMIN APIs

Required APIs

Users

KYC

Properties

Projects

CMS

Support

Reports

PROMPT

Generate Admin APIs.

Implement:

RBAC

Validation

Rate Limits

Audit Logs

VERIFY

Postman tests pass.

SECTION 20 — ADMIN UI

Screens

Dashboard

Users

KYC

Properties

Projects

Payments

CMS

Support

Reports

Analytics

PROMPT

Generate Admin UI.

Implement:

Desktop

Tablet

Mobile

Accessibility

Loading

Error

Success

Empty States

VERIFY

Every screen responsive.

No broken links.

SECTION 21 — OPERATIONS DASHBOARD

Management view.

Contains

Pending KYC

Pending Properties

Pending Projects

Open Tickets

Refund Requests

PROMPT

Generate Operations Dashboard.

Implement:

Queues

Assignments

Monitoring

VERIFY

Pending items visible.

SECTION 22 — ADMIN AUDIT

Prompt

Audit Admin Module.

Check:

Users

KYC

Moderation

CMS

Support

Reports

Analytics

Every Button

Every API

Every Workflow

Generate report.

SECTION 23 — OPERATIONAL ATTACK TEST

Prompt

Pretend you are an admin.

Try:

Wrong Approval

Duplicate Refund

Permission Escalation

CMS Abuse

Report Abuse

Generate report.

SECTION 24 — ADMIN ACCEPTANCE CHECKLIST

Before Super Admin Module:

- ✓ Dashboard
- ✓ User Management
- ✓ Verification
- ✓ KYC
- ✓ Property Moderation
- ✓ Project Moderation
- ✓ Lead Monitoring
- ✓ Subscription Management
- ✓ Payment Management
- ✓ CMS
- ✓ Blog
- ✓ Support Tickets
- ✓ Reports
- ✓ Analytics

- ✓ Audit Logs
- ✓ Notifications
- ✓ RBAC
- ✓ APIs
- ✓ Responsive UI
- ✓ Security Audit Passed
- ✓ Operational Attack Audit Passed
- ✓ No TODO
- ✓ No Placeholder
- ✓ No Mock Data
- ✓ No Fake Buttons

CRITICAL RULE

Before Part 11:

Create test data:

```
100 Users

50 KYC Requests

100 Properties

20 Projects

50 Support Tickets

100 Payments

20 Refunds
```

Verify manually:

- KYC Flow
- Moderation Flow

- CMS Updates
- Support Workflow
- Refund Workflow
- Reports
- Audit Logs

Only after everything passes move to Super Admin Module.

END OF PART 10

Part 11 will cover the highest privilege layer:

- Super Admin
- Tenant Management
- Global RBAC
- Feature Flags
- Platform Settings
- Monitoring
- Integrations
- Infrastructure Controls
- Global Analytics
- System Health
- Incident Management
- Backup Management
- Disaster Recovery

This is the actual platform governance layer.

6/12/2026, 2:25:11 PM

part 11 do not skip anything do not miss anything

6/12/2026, 2:26:14 PM

PART 11 — COMPLETE SUPER ADMIN, PLATFORM GOVERNANCE, FEATURE FLAGS, TENANT MANAGEMENT & INFRASTRUCTURE CONTROL SYSTEM

IMPORTANT

This is NOT Admin Panel.

This is:

Platform Owner Panel

Only platform owner (you) can access.

Difference

Admin

Works on:

Users

Properties

Projects

Support

CMS

Super Admin

Controls:

Entire Platform

All Tenants

All Plans

All Feature Flags

All Infrastructure

All Monitoring

All Integrations

All Billing Rules

All Permissions

If Super Admin wrong:

✗ Entire platform can break

✗ Revenue controls fail

✗ Security risks

✗ Tenant leakage

✗ Feature rollout impossible

SUPER ADMIN DEVELOPMENT ORDER

Never:

Settings Page

↓

Done

Wrong.

Correct:

Global RBAC
↓
Tenant Management
↓
Feature Flags
↓
Platform Settings
↓
Monitoring
↓
Integrations
↓
System Health
↓
Incidents
↓
Backups
↓
Disaster Recovery
↓
Global Analytics
↓
Audit Logs
↓
Governance Dashboard

SECTION 1 — MASTER SUPER ADMIN PROMPT

Claude Prompt

Read:

Blueprint

Feature Registry

Super Admin Schema

Super Admin APIs

Super Admin UI

Generate Super Admin Module only.

Implement:

Tenant Management

Global RBAC

Feature Flags

Platform Settings

System Monitoring

Integrations

Global Analytics

Audit Logs

Incident Management

Backups

Disaster Recovery

Validation

Testing

Perform:

Security Audit

Governance Audit

Scalability Audit

Production Audit

Do not generate SEO Module.

SECTION 2 — GLOBAL SUPER ADMIN AUTHORIZATION

Most critical.

Only:

Platform Owner

Can access.

PROMPT

Generate Super Admin Authorization.

Implement:

Platform Owner

Platform Admin

Read Only Auditor

Permissions

Session Controls

Audit Logs

VERIFY

Normal Admin

↓

Cannot open Super Admin.

Platform Owner

Can access.

SECTION 3 — TENANT MANAGEMENT

If future SaaS becomes multi-tenant.

Tenant Entity

Tenant Name

Domain

Subscription

Storage

Users

Usage

Status

PROMPT

Generate Tenant Management .

Implement :

Create

Suspend

Activate

Delete

Usage Tracking

Billing Integration

VERIFY

Tenant suspended.

Users blocked.

Tenant activated.

Users restored.

SECTION 4 — GLOBAL RBAC

Highest level permissions.

Roles

Platform Owner

Platform Admin

Security Auditor

Finance Auditor

Operations Auditor

PROMPT

Generate Global RBAC.

Implement:

Role Creation

Permission Mapping

Feature Permissions

Audit Logs

VERIFY

Auditor cannot modify.

Only view.

SECTION 5 — FEATURE FLAG SYSTEM

One of the most important modules.

Purpose:

Enable feature without deployment.

Examples:

AI Search

Voice Search

WhatsApp CRM

Ads

New Homepage

Beta Features

PROMPT

Generate Feature Flag System.

Implement:

Create

Enable

Disable

Percentage Rollout

User Rollout

Tenant Rollout

VERIFY

Disable AI Search.

Feature disappears.

Enable AI Search.

Feature available.

SECTION 6 — PLATFORM SETTINGS

Global settings.

Contains:

Branding

Emails

SMS

WhatsApp

SEO Defaults

Payments

Uploads

Security

PROMPT

Generate Platform Settings.

Implement:

Global Configuration

Validation

Version History

Audit Logs

VERIFY

Setting changes reflect globally.

SECTION 7 — SYSTEM MONITORING

Critical.

Monitor:

API Health

Database

Storage

Realtime

Payments

Email

WhatsApp

PROMPT

Generate Monitoring System.

Implement:

Health Checks

Status Dashboard

Alerts

Historical Metrics

VERIFY

Service failure visible.

Alerts generated.

SECTION 8 — ERROR TRACKING

Track:

Frontend Errors

Backend Errors

API Errors

Database Errors

PROMPT

Generate Error Tracking.

Implement:

Collection

Categorization

Alerting

Resolution Tracking

VERIFY

Error appears in dashboard.

SECTION 9 — INCIDENT MANAGEMENT

Enterprise feature.

Lifecycle

Incident

↓

Assigned

↓

Investigating

↓

Resolved

↓

Closed

PROMPT

Generate Incident Management.

Implement:

Create

Assign

Resolve

Postmortem

Timeline

VERIFY

Incident lifecycle works.

SECTION 10 — INTEGRATION MANAGEMENT

External services.

Supported:

Supabase

Razorpay

Google

PostHog

WhatsApp

SMTP

Cloudflare

PROMPT

Generate Integration Management.

Implement:

Connection Status

Credential Validation

Health Checks

Audit Logs

VERIFY

Disconnected service visible.

Health check works.

SECTION 11 — GLOBAL ANALYTICS

Entire platform analytics.

Metrics:

Users

Properties

Projects

Leads

Revenue

Subscriptions

Messages

Storage

PROMPT

Generate Global Analytics.

Implement:

Charts

Comparisons

Exports

Time Filters

VERIFY

Metrics match platform data.

SECTION 12 — SECURITY CENTER

Most critical.

Track:

Failed Logins

Suspicious Activity

Blocked IPs

Security Events

PROMPT

Generate Security Center.

Implement:

Threat Dashboard

IP Blocking

Security Reports

Alerts

VERIFY

Blocked IP appears.

Security event tracked.

SECTION 13 — BACKUP MANAGEMENT

Mandatory.

Backup Types

Database

Storage

Configurations

PROMPT

Generate Backup System.

Implement:

Manual Backup

Scheduled Backup

Restore

Verification

VERIFY

Backup created.

Restore tested.

SECTION 14 — DISASTER RECOVERY

Most developers ignore.

Huge mistake.

Scenarios:

Database Failure

Storage Failure

Region Failure

Payment Failure

PROMPT

Generate Disaster Recovery Plan.

Implement:

Recovery Procedures

Validation

Recovery Testing

VERIFY

Recovery process documented.

SECTION 15 — GLOBAL AUDIT LOGS

Track everything.

Track:

Settings

Users

Payments

Permissions

Features

Incidents

PROMPT

Generate Global Audit Logs.

Implement:

Search

Filters

Exports

Retention Policies

VERIFY

Every action logged.

SECTION 16 — GOVERNANCE DASHBOARD

Executive dashboard.

Widgets:

Revenue

Users

Growth

Incidents

Errors

Subscriptions

Health

PROMPT

Generate Governance Dashboard.

Implement:

Executive KPIs

Charts

Reports

Exports

VERIFY

KPIs accurate.

SECTION 17 — COMPLIANCE CENTER

Future-proof.

Track:

Privacy

Terms

Consent

Data Requests

Retention

PROMPT

Generate Compliance Center.

Implement:

Consent Logs

Policy Tracking

Data Requests

Retention Rules

VERIFY

Compliance records available.

SECTION 18 — SUPER ADMIN APIs

Required APIs

Tenants

Flags

Settings

Monitoring

Analytics

Incidents

Backups

PROMPT

Generate Super Admin APIs.

Implement:

RBAC

Validation

Rate Limits

Audit Logs

VERIFY

Postman tests pass.

SECTION 19 — SUPER ADMIN UI

Screens

Governance Dashboard

Tenants

Feature Flags

Settings

Monitoring

Security

Backups

Incidents

Analytics

PROMPT

Generate Super Admin UI.

Implement:

Desktop

Tablet

Accessibility

Loading

Error

Success

Empty States

VERIFY

All screens functional.

SECTION 20 — PLATFORM STRESS TEST

Prompt

Pretend platform has:

100,000 Users

10,000 Brokers

5,000 Builders

1,000,000 Properties

Audit:

Monitoring

Analytics

Permissions

Infrastructure

Generate report.

SECTION 21 — SUPER ADMIN AUDIT

Prompt

Audit Super Admin Module.

Check:

Tenants

RBAC

Flags

Monitoring

Security

Backups

Incidents

Every Button

Every API

Every Workflow

Generate report.

SECTION 22 — PLATFORM OWNER ATTACK TEST

Prompt

Pretend you are a malicious platform administrator.

Try:

Privilege Escalation

Feature Abuse

Tenant Leakage

Monitoring Bypass

Audit Log Tampering

Generate report.

SECTION 23 — SUPER ADMIN ACCEPTANCE CHECKLIST

Before SEO & Growth Phase:

- ✓ Global Authorization
- ✓ Tenant Management
- ✓ Global RBAC
- ✓ Feature Flags
- ✓ Platform Settings
- ✓ Monitoring
- ✓ Error Tracking
- ✓ Incident Management
- ✓ Integrations
- ✓ Analytics
- ✓ Security Center
- ✓ Backups
- ✓ Disaster Recovery
- ✓ Audit Logs
- ✓ Governance Dashboard
- ✓ Compliance Center
- ✓ APIs
- ✓ Responsive UI
- ✓ Security Audit Passed
- ✓ Platform Attack Audit Passed
- ✓ No TODO
- ✓ No Placeholder
- ✓ No Mock Data

CRITICAL RULE

Before Part 12:

Create test data:

10 Tenants

50 Feature Flags

20 Incidents

100 Audit Events

50 Monitoring Alerts

20 Backups

Verify manually:

- Feature Flags
- Monitoring
- Security Center
- Backup Restore
- Incident Workflow
- Governance Dashboard

Only after everything passes move to Part 12.

END OF PART 11

Part 12 will be one of the most important phases of the entire project:

- Complete UI/UX System
- Design System
- Responsive Architecture

- Mobile First Rules
- Accessibility
- Component Library
- Theme System
- Dark Mode
- Animation Standards
- Dashboard UX
- Property UX
- CRM UX
- Admin UX
- UX Audits
- UI Testing

This phase decides whether users love the platform or leave it.

6/12/2026, 2:26:18 PM

part 12 do not skip anything do not miss anything

6/12/2026, 2:27:33 PM

PART 12 - COMPLETE UI/UX DESIGN SYSTEM, RESPONSIVE ARCHITECTURE & FRONTEND QUALITY FRAMEWORK

IMPORTANT

Part 12 is one of the most important parts of the entire project.

Reality:

Users don't see:

- ✗ Database
- ✗ APIs
- ✗ Supabase
- ✗ RLS
- ✗ CRM Engine

Users only see:

- ✓ UI
 - ✓ UX
 - ✓ Speed
 - ✓ Mobile Experience
 - ✓ Search Experience
-

If UI bad:

Users leave.

Even if backend is perfect.

UI DEVELOPMENT RULE

Never allow Claude to directly generate screens.

Wrong:

Create Homepage

Correct:

Design System
↓
Component Library
↓
Layout System
↓
Responsive System
↓
Page Templates
↓
Actual Pages

SECTION 1 - MASTER UI PROMPT

Claude Prompt

Read:

Blueprint

Feature Registry

UI Wireframes

Design Requirements

Generate complete Design System.

Do NOT generate pages.

Generate:

Design Language

Spacing System

Typography

Color System

Component System

Responsive System

Accessibility System

Animation System

Dashboard UX Standards

Admin UX Standards

CRM UX Standards

Property UX Standards

Perform UX Audit before completion.

SECTION 2 - UI PHILOSOPHY

Your website should NOT look like:

Basic SaaS Template

or

Random ThemeForest Template

Target:

Mix best UX patterns from:

- [Housing.com](https://www.housing.com)

- [99acres](#)
- [MagicBricks](#)
- [NoBroker](#)
- [Airbnb](#)
- [Stripe](#)

Use as inspiration only.

Never copy.

SECTION 3 - DESIGN SYSTEM

Foundation.

PROMPT

Generate Design System.

Define:

Colors

Typography

Spacing

Border Radius

Elevation

Shadows

Icons

States

Accessibility

VERIFY

Every component uses same system.

No random colors.

No random spacing.

SECTION 4 - COLOR SYSTEM

Claude Prompt

Generate Color Architecture.

Include:

Primary

Secondary

Accent

Success

Warning

Error

Info

Neutral

Dark Mode

VERIFY

No more than:

1 Primary

1 Secondary

Main palette.

SECTION 5 - TYPOGRAPHY SYSTEM

Prompt

Generate Typography System.

Define:

Headings

Subheadings

Body

Labels

Captions

Buttons

VERIFY

Typography consistent.

No random font sizes.

SECTION 6 - SPACING SYSTEM

Prompt

Generate Spacing System.

Define:

4

8

12

16

24

32

48

64

80

VERIFY

Every layout follows scale.

SECTION 7 - ICON SYSTEM

Prompt

Generate Icon Guidelines.

Define:

Navigation

Property

CRM

Admin

Notifications

Analytics

VERIFY

Same icon family.

No mixed icon libraries.

SECTION 8 - COMPONENT LIBRARY

Most important.

Components:

Button

Input

Select

Checkbox

Radio

Textarea

Modal

Drawer

Tooltip

Dropdown

Table

Pagination

Tabs

Accordion

Toast

PROMPT

Generate Component Library.

For each component define:

Variants

States

Accessibility

Usage Rules

VERIFY

Every component reusable.

No duplicates.

SECTION 9 - BUTTON SYSTEM

Prompt

Generate Button Architecture.

Define:

Primary

Secondary

Ghost

Danger

Success

Icon Buttons

VERIFY

Loading state exists.

Disabled state exists.

SECTION 10 - FORM SYSTEM

Critical.

Prompt

Generate Form UX Standards.

Define:

Validation

Errors

Success

Autosave

Draft Save

VERIFY

No hidden errors.

Validation clear.

SECTION 11 - TABLE SYSTEM

Admin + CRM heavy.

Prompt

Generate Table UX Standards.

Implement:

Filters

Sorting

Bulk Actions

Exports

Pagination

VERIFY

Works on mobile.

SECTION 12 - RESPONSIVE ARCHITECTURE

Most important.

Breakpoints

320

375

768

1024

1280

1440

1920

PROMPT

Generate Responsive Architecture.

Define:

Mobile

Tablet

Laptop

Desktop

Ultra Wide

VERIFY

No horizontal scroll.

SECTION 13 - MOBILE FIRST RULES

All screens.

Prompt

Generate Mobile First Standards.

Define:

Navigation

Forms

Tables

Cards

Filters

VERIFY

Every page usable one-handed.

SECTION 14 - PROPERTY UX

Most important public page.

Must contain:

Gallery

Price

Amenities

Map

Builder

Contact

WhatsApp

Share

Save

Compare

PROMPT

Generate Property UX.

Optimize:

Lead Conversion

Mobile Usage

SEO

Speed

VERIFY

Important actions visible above fold.

SECTION 15 - PROJECT UX

Must contain:

Overview

Amenities

Inventory

Floor Plans

Brochure

Builder

Visits

PROMPT

Generate Project UX.

Optimize:

Lead Conversion

Builder Trust

Project Discovery

VERIFY

Project inquiry easy.

SECTION 16 - SEARCH UX

Critical.

Prompt

Generate Search UX.

Implement:

Autocomplete

Recent Searches

Saved Searches

AI Search

Voice Search

VERIFY

Search within 1 click.

SECTION 17 - CRM UX

Most important internal screen.

Prompt

Generate CRM UX.

Optimize:

Lead Processing

Followups

Kanban

Activities

VERIFY

Broker can manage leads quickly.

SECTION 18 - ADMIN UX

Prompt

Generate Admin UX.

Optimize:

Moderation

Approvals

Reports

Operations

VERIFY

Admin workflow efficient.

SECTION 19 - SUPER ADMIN UX

Prompt

Generate Super Admin UX.

Optimize:

Monitoring

Governance

Security

Analytics

VERIFY

Critical controls obvious.

SECTION 20 - DARK MODE

Future ready.

Prompt

Generate Dark Mode System.

Implement:

Theme Tokens

Component Variants

Accessibility

VERIFY

Every component supports dark mode.

SECTION 21 - ACCESSIBILITY

Mandatory.

Target:

WCAG AA

Prompt

Generate Accessibility Standards.

Implement:

Keyboard

Screen Reader

Contrast

Focus States

ARIA

VERIFY

Keyboard navigation works.

SECTION 22 - ANIMATION SYSTEM

Important.

Prompt

Generate Animation Standards.

Define:

Page Transitions

Modals

Dropdowns

Loading

Toasts

VERIFY

Animations subtle.

No flashy effects.

SECTION 23 - EMPTY STATES

Most developers skip.

Prompt

Generate Empty State System.

For :

Properties

Projects

CRM

Messages

Notifications

VERIFY

No blank screens.

SECTION 24 - LOADING STATES

Prompt

Generate Loading System.

Implement :

Skeletons

Spinners

Progress Bars

VERIFY

No layout shift.

SECTION 25 - ERROR STATES

Prompt

Generate Error UX.

Implement :

Network

Validation

Permission

Server Errors

VERIFY

Errors understandable.

SECTION 26 - DESIGN QA SYSTEM

Prompt

Audit entire UI.

Check:

Consistency

Spacing

Typography

Colors

Responsiveness

Accessibility

Generate report.

SECTION 27 - DEVICE TEST MATRIX

Test:

iPhone SE

iPhone 15

Samsung A Series

iPad

MacBook

Windows Laptop

UltraWide Monitor

VERIFY

Every screen works.

SECTION 28 - UX ATTACK TEST

Prompt

Pretend you are:

Buyer

Broker

Builder

Admin

Super Admin

Try completing tasks.

Find UX friction.

Generate report.

SECTION 29 - UI ACCEPTANCE CHECKLIST

Before SEO Phase:

- ✓ Design System
- ✓ Color System
- ✓ Typography
- ✓ Components
- ✓ Forms
- ✓ Tables
- ✓ Responsive
- ✓ Mobile First
- ✓ Property UX
- ✓ Project UX
- ✓ Search UX
- ✓ CRM UX

- ✓ Admin UX
- ✓ Super Admin UX
- ✓ Dark Mode
- ✓ Accessibility
- ✓ Animations
- ✓ Empty States
- ✓ Loading States
- ✓ Error States
- ✓ UX Audit Passed
- ✓ Device Testing Passed
- ✓ No Inconsistent Design
- ✓ No Broken Responsive Layout

CRITICAL RULE

Before Part 13:

Manually test:

100+ Screens

All Roles

All Dashboards

All Forms

All Tables

All Filters

Take screenshots.

Create UI audit document.

Only after UI is fully approved move to SEO & Growth Architecture.

END OF PART 12

Part 13 will cover:

- Complete SEO Architecture
- Technical SEO
- Programmatic SEO
- City Pages
- Area Pages
- Builder SEO
- Property SEO
- Blog SEO
- Schema
- Sitemap
- Robots
- Search Console
- Indexing
- Internal Linking
- SEO Monitoring
- Growth Engine

This phase determines whether you get organic traffic or not.

6/12/2026, 2:27:38 PM

part 13 do not skip anything do not miss anything

6/12/2026, 2:28:42 PM

PART 13 - COMPLETE SEO, PROGRAMMATIC SEO, GEO SEO, CONTENT ENGINE & ORGANIC GROWTH SYSTEM

IMPORTANT

Part 13 determines:

Traffic
Leads
Revenue
Growth

Aapki website technically perfect ho sakti hai.

But SEO nahi hua:

- ✗ No traffic
- ✗ No leads
- ✗ No organic growth
- ✗ High ad dependency
- ✗ High customer acquisition cost

REALITY

Most Real Estate portals get:

60%-90%

traffic from SEO.

This phase is NOT optional.

SEO DEVELOPMENT ORDER

Never:

```
Meta Title
↓
SEO Complete
```

Wrong.

Correct:

```
Technical SEO

Open Graph

Twitter Cards

Robots

Sitemap

Structured Data

PROMPT

Generate Technical SEO System.

Implement:

Metadata

Canonical

OG

Twitter

Robots

Sitemap

Indexation Rules

VERIFY

Open source code.

Check:

```
<title>
```

```
<meta>
```

```
<link rel="canonical">
```

```
schema
```

Exists.

SECTION 3 - PROPERTY SEO

Most important.

Property URL:

Example:

```
/property/2-bhk-flat-rajkot-kalawad-road
```

PROMPT

Generate Property SEO.

Implement:

SEO Slugs

Meta Titles

Meta Descriptions

Canonical

Property Schema

Breadcrumb Schema

VERIFY

Every property page unique.

No duplicate title.

SECTION 4 - PROJECT SEO

Project pages.

Example:

```
/project/shiv-heights-rajkot
```

PROMPT

Generate Project SEO.

Implement:

Meta

Schema

Canonical

Project Rich Results

VERIFY

Every project page unique.

Indexed correctly.

SECTION 5 - BUILDER SEO

Huge traffic source.

Example:

/builders/abc-developers

PROMPT

Generate Builder SEO.

Implement:

Builder Schema

Projects Linking

Meta

Canonical

VERIFY

Builder page indexed.

Projects linked.

SECTION 6 - CITY SEO

Massive traffic opportunity.

Example:

/properties-in-rajkot

/properties-in-ahmedabad

PROMPT

Generate City SEO Architecture.

Implement:

City Pages

City Content

City Schema

Internal Linking

VERIFY

City pages generated dynamically.

SECTION 7 - AREA SEO

Even more powerful.

Example:

```
/properties-in-kalawad-road
```

```
/properties-in-university-road
```

PROMPT

Generate Area SEO Pages.

Implement:

Dynamic Area Pages

Area Metadata

Area Content

Area Schema

VERIFY

Area pages indexed.

SECTION 8 - PROGRAMMATIC SEO

One of the most important growth systems.

Examples:

```
2 BHK in Rajkot
```

```
3 BHK in Rajkot
```

Plots in Rajkot

Properties under 50 lakh

Properties near Airport

Thousands of pages.

PROMPT

Generate Programmatic SEO Engine.

Implement:

Dynamic SEO Pages

Metadata

Canonical

Schema

Indexation Rules

VERIFY

Pages generated.

No duplicate content.

SECTION 9 - PROPERTY TYPE SEO

Examples:

Flats

Plots

Villas

Commercial

Office

Warehouse

PROMPT

Generate Property Type SEO.

Implement:

Landing Pages

Metadata

Schema

Internal Linking

VERIFY

Every property type has SEO page.

SECTION 10 - BLOG SEO

Content engine.

Categories:

Buying Guide

Selling Guide

Investment

Home Loans

Builders

Market Trends

PROMPT

Generate Blog SEO System.

Implement:

Categories

Tags

Schema

Related Articles

Internal Links

VERIFY

Blog article indexed.

Schema present.

SECTION 11 - FAQ SEO

Very important.

Pages:

Property FAQ

Project FAQ

PROMPT

Generate FAQ SEO.

Implement:

FAQ Schema

Dynamic FAQs

Internal Links

VERIFY

FAQ schema valid.

SECTION 12 - SCHEMA MARKUP

Mandatory.

Types:

Organization

Website

Breadcrumb

Property

Project

FAQ

Article

Local Business

PROMPT

Generate Schema Strategy.

Implement all required schemas.

Validate compatibility.

VERIFY

Use:

- [Google Rich Results Test](#)

Schema valid.

SECTION 13 - SITEMAP SYSTEM

Must generate:

Pages

Properties

Projects

Builders

Blogs

Cities

Areas

PROMPT

Generate Sitemap Architecture.

Implement:

Dynamic Sitemaps

Index Sitemap

Automatic Updates

VERIFY

Sitemap updates automatically.

SECTION 14 - ROBOTS STRATEGY

Allow:

Public Pages

Block:

Admin

Dashboard

Private Areas

PROMPT

Generate Robots Strategy.

Define:

Allow

Disallow

Noindex Rules

VERIFY

Sensitive pages blocked.

SECTION 15 - INTERNAL LINKING

Most people skip.

Huge mistake.

Examples:

Property →

Related Properties

Related Projects

Related Builders

PROMPT

Generate Internal Linking System.

Implement:

Related Content

Contextual Links

Navigation Links

VERIFY

Every page connected.

No orphan pages.

SECTION 16 - SEARCH CONSOLE SETUP

Manual.

Setup:

[Google Search Console](#)

Verify:

Domain

Sitemap

Coverage

Performance

SECTION 17 - INDEXING STRATEGY

Prompt

Generate Indexing Rules.

Define:

Index

Noindex

Canonical

Duplicate Prevention

VERIFY

No duplicate pages indexed.

SECTION 18 - LOCAL SEO

Critical for Real Estate.

Include:

Cities

Areas

Builders

Projects

PROMPT

Generate Local SEO System.

Implement:

Location Pages

Local Schema

Local Content

VERIFY

City pages rank-ready.

SECTION 19 - SEO ANALYTICS

Track:

Organic Traffic

Keywords

Leads

Conversions

Pages

PROMPT

Generate SEO Analytics.

Implement:

Rank Tracking

Traffic Tracking

Conversion Tracking

VERIFY

Data matches Search Console.

SECTION 20 - CONTENT ENGINE

Growth machine.

Content Types:

Blogs

Area Guides

City Guides

Builder Guides

Investment Guides

PROMPT

Generate Content Engine.

Implement:

Templates

SEO Standards

Publishing Workflow

VERIFY

Content follows standards.

SECTION 21 - SEO AUTOMATION

Huge growth feature.

Auto-generate:

Meta

Schema

Sitemaps

Internal Links

PROMPT

Generate SEO Automation.

Implement :

Automatic Metadata

Automatic Schema

Automatic Linking

VERIFY

New property generates SEO automatically.

SECTION 22 - SEO AUDIT SYSTEM

Prompt

Audit SEO Architecture.

Check:

Technical SEO

Property SEO

Project SEO

Builder SEO

Schema

Sitemaps

Internal Linking

Generate report.

SECTION 23 - SEO ATTACK TEST

Prompt

Pretend you are Google.

Find:

Duplicate Content

Thin Content

Broken Links

Indexation Problems

Schema Errors

Generate report.

SECTION 24 - SEO ACCEPTANCE CHECKLIST

Before Testing & Launch Phase:

- ✓ Technical SEO
- ✓ Property SEO
- ✓ Project SEO
- ✓ Builder SEO
- ✓ City SEO
- ✓ Area SEO
- ✓ Programmatic SEO
- ✓ Blog SEO
- ✓ FAQ SEO
- ✓ Schema
- ✓ Sitemap
- ✓ Robots
- ✓ Internal Linking
- ✓ Search Console

- ✓ Indexing Rules
 - ✓ Local SEO
 - ✓ Analytics
 - ✓ Content Engine
 - ✓ Automation
 - ✓ SEO Audit Passed
 - ✓ Attack Test Passed
 - ✓ No Duplicate Metadata
 - ✓ No Orphan Pages
-

CRITICAL RULE

Before Part 14:

Create test content:

100 Properties

20 Projects

20 Builders

50 Blogs

10 Cities

50 Areas

Verify manually:

- Sitemap
- Schema
- Metadata
- Internal Links
- Search Console Coverage

- Page Indexability

Only after all SEO checks pass move to Testing, QA, Security, Deployment & Launch Phase.

END OF PART 13

Part 14 will be the final and most critical phase:

- Complete QA System
- Manual Testing
- Automated Testing
- Security Testing
- Performance Testing
- Load Testing
- UAT
- Staging Deployment
- Production Deployment
- Monitoring
- Backups
- Launch Checklist
- Post Launch SOP
- Future Feature Development Framework

This phase decides whether the platform launches successfully or becomes a bug-fixing project.

6/12/2026, 2:28:48 PM

part 14 do not skip anything do not miss anything

6/12/2026, 2:30:09 PM

PART 14 - COMPLETE QA, TESTING, SECURITY, PERFORMANCE, DEPLOYMENT, LAUNCH & POST-LAUNCH SYSTEM

IMPORTANT

Part 14 is the final phase.

Most projects fail here.

Reason:

Developers think:

```
Code Complete
=
Project Complete
```

Wrong.

Reality:

```
Code Complete
↓
Testing
↓
Fixing
↓
Security
↓
Performance
↓
Deployment
↓
Monitoring
```

↓
Launch

Only then project complete.

FINAL PROJECT FLOW

At this stage:

- ✓ Database
- ✓ Auth
- ✓ Property
- ✓ Projects
- ✓ CRM
- ✓ Messaging
- ✓ Payments
- ✓ Admin
- ✓ Super Admin
- ✓ UI/UX
- ✓ SEO

completed.

Now:

QA
↓
Security
↓
Performance
↓
Deployment
↓
Launch

SECTION 1 - MASTER QA PROMPT

Claude Prompt

Read complete project.

Act as:

Senior QA Engineer

Senior Security Engineer

Senior Performance Engineer

Senior Product Auditor

Senior UAT Tester

Audit entire platform.

Check:

All Modules

All APIs

All Roles

All Dashboards

All Workflows

All Permissions

Generate complete report.

Do not write code.

SECTION 2 - COMPLETE FEATURE AUDIT

Most important.

Prompt

Audit complete platform.

Check:

Authentication

Property

Projects

CRM

Messaging

Payments

Admin

Super Admin

SEO

Analytics

Support

CMS

Generate missing feature report.

VERIFY

Every feature from Feature Registry exists.

If missing:

Do not continue.

SECTION 3 - ROLE TESTING

Test every role.

Roles

Buyer

Broker

Builder

Agency

Admin

Super Admin

Prompt

Test platform role by role.

Verify:

Pages

Buttons

Menus

APIs

Permissions

Generate report.

VERIFY

Buyer cannot access:

Admin

Broker cannot access:

Platform Settings

Admin cannot access:

Global Governance

SECTION 4 - API TESTING

Every API.

Prompt

Generate API Test Plan.

Cover:

Success Cases

Validation Cases

Authorization Cases

Failure Cases

Rate Limits

VERIFY

Use:

Postman

or

Thunder Client

Test:

200

400

401

403

404

429

500

Responses.

SECTION 5 - DATABASE TESTING

Prompt

Audit database.

Check:

Tables

Indexes

Constraints

Triggers

Functions

Policies

RLS

Relations

Generate report.

VERIFY

Run:

```
SELECT COUNT(*)  
FROM pg_policies;
```

Policies exist.

Run:

```
SELECT COUNT(*)  
FROM information_schema.triggers;
```

Triggers exist.

SECTION 6 - UI TESTING

Test:

Every Screen

Prompt

Audit all UI screens.

Check:

Responsive

Loading

Errors

Empty States

Accessibility

Generate report.

VERIFY

No broken layout.

No overlap.

No overflow.

SECTION 7 - RESPONSIVE TESTING

Mandatory.

Devices:

320px

375px

768px

1024px

1280px

1440px

1920px

Prompt

Audit responsive behavior.

Find:

Overflow

Broken Cards

Broken Tables

Broken Forms

Generate report.

VERIFY

No horizontal scrolling.

SECTION 8 - FORM TESTING

Every form.

Prompt

Audit all forms.

Check:

Validation

Required Fields

Uploads

Error Handling

Generate report.

VERIFY

Wrong email.

Error.

Empty field.

Error.

Success.

Works.

SECTION 9 - SEARCH TESTING

Critical.

Test:

Property Search

Project Search

AI Search

Voice Search

Prompt

Audit search system.

Check:

Results

Filters

Sorting

Autocomplete

Generate report.

VERIFY

Search results accurate.

SECTION 10 - SECURITY AUDIT

Most important.

Prompt

Act as Senior Security Engineer.

Audit:

Authentication

JWT

RBAC

RLS

Payments

Storage

Uploads

Messaging

Generate vulnerability report.

VERIFY

No privilege escalation.

SECTION 11 - PENETRATION TEST

Prompt

Pretend you are a hacker.

Try:

JWT Manipulation

RBAC Bypass

SQL Injection

XSS

CSRF

File Upload Abuse

Generate report.

VERIFY

Issues fixed.

Re-test.

SECTION 12 - PAYMENT SECURITY

Critical.

Prompt

Audit payment system.

Check:

Razorpay

Webhooks

Refunds

Invoices

Plan Enforcement

Generate report.

VERIFY

Fake payment rejected.

Fake webhook rejected.

SECTION 13 - PERFORMANCE TESTING

Target:

Homepage

<2 sec

Property Page

<2 sec

Search

<1 sec

Prompt

Audit performance.

Check:

Page Load

API Response

Search

Images

Database Queries

Generate report.

VERIFY

Use:

- [PageSpeed Insights](#)
- [Lighthouse](#)

SECTION 14 - LOAD TESTING

Important.

Simulate:

100 Users

1000 Users

5000 Users

Prompt

Generate load testing strategy.

Check:

API

Database

Realtime

Payments

VERIFY

System stable.

SECTION 15 - UAT

User Acceptance Testing.

Test Personas

Buyer

Broker

Builder

Agency

Admin

Super Admin

Prompt

Generate UAT plan.

Create real world scenarios.

Verify complete workflows.

VERIFY

All scenarios complete successfully.

SECTION 16 - PRE-LAUNCH AUDIT

Critical.

Prompt

Act as Product Auditor.

Pretend launch is tomorrow.

Find:

Missing Features

Broken Flows

Security Risks

Performance Risks

Generate report.

VERIFY

All critical issues fixed.

SECTION 17 - STAGING DEPLOYMENT

Deploy to:

Staging

Check:

Auth

Payments

CRM

Messaging

SEO

All work.

SECTION 18 - PRODUCTION DEPLOYMENT

Deployment Order

Database

Storage

Backend

Frontend

Monitoring

Never:

Frontend First

SECTION 19 - MONITORING SETUP

Setup:

- [PostHog](#)
- [Google Analytics](#)
- [Microsoft Clarity](#)

Track:

Traffic

Leads

Revenue

Errors

Funnels

SECTION 20 - BACKUP VERIFICATION

Test:

Database Restore

Storage Restore

Settings Restore

Prompt

Audit backup system.

Verify recovery process.

VERIFY

Restore works.

SECTION 21 - LAUNCH CHECKLIST

Must be 100%.

Technical

- ✓ SSL
 - ✓ CDN
 - ✓ DNS
 - ✓ Sitemap
 - ✓ Robots
 - ✓ Search Console
-

Application

- ✓ Auth
 - ✓ Property
 - ✓ Projects
 - ✓ CRM
 - ✓ Messaging
 - ✓ Payments
 - ✓ Admin
 - ✓ Super Admin
-

Security

- ✓ RBAC
 - ✓ RLS
 - ✓ JWT
 - ✓ Payment Security
-

SEO

- ✓ Metadata
 - ✓ Schema
 - ✓ Internal Linking
 - ✓ Sitemaps
-

Performance

✓ Images Optimized

✓ Lighthouse Tested

✓ Queries Optimized

SECTION 22 - GO LIVE PROCEDURE

Order:

Production DB

↓

Production Storage

↓

Production Backend

↓

Production Frontend

↓

Monitoring

↓

Search Console

↓

Analytics

↓

Launch

SECTION 23 - FIRST 24 HOURS MONITORING

Monitor:

Errors

Payments

Search

Leads

CRM

Messaging

Every hour.

SECTION 24 - FIRST 7 DAYS MONITORING

Monitor:

Traffic

Conversions

Funnels

Payments

Support Tickets

Daily.

SECTION 25 - FIRST 30 DAYS OPTIMIZATION

Focus:

SEO

Speed

Conversions

Lead Quality

Subscription Sales

SECTION 26 - POST LAUNCH FEATURE FRAMEWORK

When adding feature:

Never directly code.

Process:

Requirement

↓

Feature Registry Update

↓

Database

↓

API

↓

UI

↓

Testing

↓

Deployment

SECTION 27 - CLAUDE CHANGE REQUEST PROMPT

Whenever future feature needed.

Use:

Read complete project architecture.

Analyze impact.

Check:

Database

APIs

Permissions

UI

SEO

Analytics

Audit Logs

Generate implementation plan.

Do not write code yet.

SECTION 28 - FUTURE FEATURE AUDIT

Before coding any future feature.

Prompt

Analyze proposed feature.

Find:

Dependencies

Database Impact

API Impact

Permission Impact

SEO Impact

Scalability Risks

Generate report.

SECTION 29 - FINAL PLATFORM CERTIFICATION

Prompt

Act as:

CTO

Security Engineer

QA Lead

Product Owner

DevOps Engineer

Audit complete platform.

Would you approve production launch?

Generate detailed certification report.

SECTION 30 - FINAL ACCEPTANCE CHECKLIST

Project Complete Only If:

✅ All Modules Built

✅ All APIs Working

- ✓ All Permissions Working
- ✓ All Dashboards Working
- ✓ All SEO Working
- ✓ All Payments Working
- ✓ Security Audit Passed
- ✓ Performance Audit Passed
- ✓ Load Test Passed
- ✓ UAT Passed
- ✓ Staging Passed
- ✓ Production Ready
- ✓ Monitoring Ready
- ✓ Backups Verified
- ✓ Launch Checklist Complete
- ✓ No TODO
- ✓ No Mock Data
- ✓ No Placeholder
- ✓ No Fake Buttons
- ✓ No Broken Workflows

MASTER RULE FOR CLAUDE PRO

Never ask Claude:

Build Entire Website

Always:

One Module

One Audit

One Verification

One Deployment Step

This is how you successfully build and launch the complete real-estate SaaS platform within Claude Pro limits while keeping it scalable, maintainable, SEO-ready, and production-grade.

END OF PART 14 - COMPLETE DEVELOPMENT TO LAUNCH FRAMEWORK

Next logical step after this is not Part 15.

It is creating a **Master Execution Index** that links all 14 parts together into a single operating manual so you can execute the project from Day 1 to Launch without losing track of dependencies.

6/12/2026, 2:30:15 PM
