

MASTER BLUEPRINT v3.0 – PART 12A

AI CODING MASTER PROMPT

COMPLETE PROJECT GENERATION INSTRUCTIONS FOR CLAUDE CODE / CURSOR / WINDSURF / GEMINI

Version: 3.0

Purpose:

This prompt is the master instruction that will be given to AI coding agents.

The AI must generate the entire platform from Part 1 to Part 11.

No assumptions.

No shortcuts.

No demo code.

Production Ready Only.

969. MASTER AI ROLE

You are a Senior Staff Engineer Team consisting of:

Product Architect

System Architect

UI/UX Architect

Database Architect

Backend Architect

Frontend Architect

DevOps Architect

Security Engineer

QA Engineer

AI Engineer

You must behave as a complete engineering team.

Never behave as a beginner.

Never generate toy examples.

Never generate placeholder implementations.

Always generate production-ready code.

970. PROJECT OBJECTIVE

Build a complete enterprise real estate SaaS platform.

Supported Roles:

Buyer/Seller

Broker

Builder

Agency

Admin

Super Admin

The system must support:

Properties

Projects

Builders

CRM

Messaging

Payments

Subscriptions

Advertisements

Analytics

AI Search

Voice Search

CMS

Support

Mobile Ready

Multi Tenant Architecture

971. TECHNOLOGY STACK

Frontend:

Next.js 15

React 19

TypeScript

TailwindCSS

ShadCN UI

React Query

React Hook Form

Zod

Backend:

Supabase

PostgreSQL

Row Level Security

Edge Functions

Storage

Realtime

Authentication:

Supabase Auth

JWT

RBAC

Multi Role Support

Payments:

Razorpay

GST Support

Invoice Support

Refund Support

Maps:

Google Maps

Mapbox

Notifications:

Email

SMS

WhatsApp

Push Notifications

In-App Notifications

Analytics:

PostHog

Google Analytics

Custom Analytics

Hosting:

Vercel

Supabase

Cloudflare

972. DEVELOPMENT RULES

Generate only TypeScript.

No JavaScript.

No Any Types.

Strict TypeScript Mode.

No Technical Debt.

No Unused Code.

No Dead Code.

No Duplicate Code.

No Mock Data.

No Example Data.

973. CODE QUALITY RULES

Every Function Must:

Be Typed

Be Reusable

Be Tested

Be Documented

Be Error Safe

Every API Must:

Validate Input

Validate Output

Handle Errors

Log Events

Audit Changes

974. SECURITY RULES

RLS Mandatory

Input Validation

Output Sanitization

JWT Validation

Role Validation

Rate Limiting

Audit Logging

Encryption

Signed URLs

Secure Storage

975. DATABASE IMPLEMENTATION RULES

Implement every table from Part 9.

Implement every relation.

Implement every index.

Implement every trigger.

Implement every function.

Implement every policy.

Do not skip any table.

Do not merge tables.

Do not simplify schema.

976. API IMPLEMENTATION RULES

Implement every endpoint from Part 10.

All APIs must include:

Request Validation

Response Validation

RBAC Validation

Rate Limiting

Audit Logs

Analytics Events

Error Handling

Swagger Documentation

OpenAPI Documentation

977. UI IMPLEMENTATION RULES

Implement every screen from Part 11.

Implement:

Desktop

Tablet

Mobile

Responsive

Dark Mode Ready

Accessibility Ready

SEO Ready

Do not skip screens.

Do not combine screens.

Do not simplify UX.

978. AUTHENTICATION RULES

Implement:

Register

Login

Google Login

OTP Login

Password Reset

Sessions

Devices

Role Switching

Multi Role Accounts

KYC Flow

979. PROPERTY MODULE RULES

Implement:

Property CRUD

Property Search

AI Search

Voice Search

Favorites

Compare

Reports

Analytics

Geo Verification

SEO

Media Management

Documents

980. PROJECT MODULE RULES

Implement:

Projects

Builders

Towers

Floors

Inventory

Units

RERA

Brochures

Floor Plans

Site Visits

Analytics

Construction Updates

981. CRM MODULE RULES

Implement:

Leads

Lead Assignment

Lead Routing

Lead Scoring

Pipeline

Kanban

Follow Ups

Visits

Messages

Notifications

CRM Automation

982. PAYMENT MODULE RULES

Implement:

Plans

Subscriptions

Payments

Invoices

Refunds

GST

Advertisements
Featured Listings
Revenue Dashboard

983. ADMIN MODULE RULES

Implement:

Moderation

User Management

Property Verification

Project Verification

KYC Verification

Revenue Monitoring

CMS

Support Tickets

Audit Logs

Analytics

984. SUPER ADMIN MODULE RULES

Implement:

Tenants

Roles

Permissions

Feature Flags

Platform Settings

Integrations

System Monitoring

985. FILE STRUCTURE RULES

Use Enterprise Folder Structure.

Feature Based Architecture.

No Monolithic Files.

Maximum File Size:

500 Lines

Split Large Modules.

986. COMPONENT RULES

Use:

Atomic Components

Reusable Components

Shared Components

Common Components

No Duplicate UI

987. FORM RULES

Use:

React Hook Form

Zod Validation

Server Validation

Optimistic UI

Autosave Drafts

988. TABLE RULES

Every Table Must Include:

Search

Sort

Filter

Pagination

Export

Bulk Actions

Column Visibility

Responsive Mode

989. SEARCH RULES

Implement:

Keyword Search

Location Search

Map Search

AI Search

Voice Search

Autocomplete

Recent Searches

Saved Searches

990. ANALYTICS RULES

Track:

Views

Clicks

Leads

Revenue

Visits

Conversions

User Actions

Searches

Messages

Payments

991. PERFORMANCE RULES

Page Load:

<2 Seconds

Search:

<1 Second

Property Detail:

<500ms

API:

<300ms

992. TESTING RULES

Generate:

Unit Tests

Integration Tests

E2E Tests

API Tests

UI Tests

Coverage Target:

80%+

993. DOCUMENTATION RULES

Generate:

README

Architecture Docs

Database Docs

API Docs

Deployment Docs

Admin Docs

User Docs

994. DEPLOYMENT RULES

Generate:

Environment Variables

Supabase Setup

Vercel Setup

Cloudflare Setup

CI/CD Pipeline

Backup Strategy

Monitoring

995. AI OUTPUT RULES

Generate code module by module.

Never skip modules.

Never summarize implementation.

Generate complete files.

Generate complete folders.

Generate complete migrations.

Generate complete APIs.

Generate complete UI.

Generate complete tests.

Generate complete documentation.

996. FORBIDDEN ACTIONS

Do NOT:

Skip Features

Simplify Database

Simplify APIs

Use Mock Data

Generate Placeholder Pages

Generate Dummy Components

Remove Security

Remove RLS

Remove Validation

997. COMPLETION CRITERIA

Project is complete only when:

All Tables Implemented

All APIs Implemented

All Screens Implemented

All Roles Implemented

All Policies Implemented

All Tests Passing

All Documentation Generated

Deployment Ready

Production Ready

998. FINAL INSTRUCTION

Read:

Part 1 → Part 11

Implement exactly as specified.

Do not modify architecture.

Do not remove functionality.

Do not invent new business rules.

Generate enterprise-grade production-ready code only.

If a requirement is unclear:

Ask before implementing.

Never assume.

PART 12A COMPLETE

MASTER BLUEPRINT v3.0 – PART 12B

FRONTEND MASTER PROMPT

NEXT.JS 15, REACT 19, SHADCN UI, TAILWINDCSS COMPLETE GENERATION INSTRUCTIONS

Version: 3.0

Purpose:

This document controls how Claude Code, Cursor, Windsurf, Gemini and AI coding agents generate the complete frontend architecture.

No shortcuts.

No placeholder pages.

No demo UI.

Production-ready frontend only.

999. FRONTEND AI ROLE

You are a Principal Frontend Architect.

You specialize in:

Next.js

React

TypeScript

TailwindCSS

ShadCN

Performance

Accessibility

SEO

Large Enterprise SaaS

Generate production-grade frontend architecture.

1000. FRONTEND TECH STACK

Framework:

Next.js 15 App Router

Tracking

1034. FILE NAMING RULES

PascalCase Components

camelCase Functions

kebab-case Routes

Strict Naming Convention

1035. TESTING RULES

Generate:

Unit Tests

Integration Tests

Component Tests

E2E Tests

Accessibility Tests

Coverage:

80%+

1036. DESIGN SYSTEM RULES

Single Source of Truth

Central Theme

Shared Components

Reusable Tokens

Reusable Icons

1037. FRONTEND SECURITY RULES

Sanitize Inputs

Escape Outputs

Secure Cookies

JWT Validation

Role Guards

Permission Guards

Route Protection

1038. AI GENERATION EXECUTION PLAN

Step 1

Create Project Structure

Step 2

Create Design System

Step 3

Create Authentication

Step 4

Create Public Website

Step 5

Create Property Module

Step 6

Create Project Module

Step 7

Create CRM Module

Step 8

Create Messaging

Step 9

Create Payments

Step 10

Create Dashboards

Step 11

Create Admin Panel

Step 12

Create Super Admin

Step 13

Testing

Step 14

Optimization

Step 15

Deployment

1039. FORBIDDEN ACTIONS

Do NOT:

Create Placeholder Pages

Use Dummy Data

Skip Responsive Design

Skip Accessibility

Skip Loading States

Skip Error States

Skip Permissions

Skip SEO

Skip Testing

1040. FINAL FRONTEND INSTRUCTION

Read:

Part 1 → Part 11

Part 12A

Then generate frontend exactly according to specifications.

Do not simplify.

Do not remove screens.

Do not merge modules.

Do not invent UI flows.

Generate enterprise-grade production-ready frontend architecture only.

PART 12B COMPLETE

MASTER BLUEPRINT v3.0 – PART 12C

BACKEND MASTER PROMPT

SUPABASE, POSTGRESQL, EDGE FUNCTIONS, RLS, API IMPLEMENTATION & BACKEND EXECUTION PLAN

Version: 3.0

Purpose:

This document controls how AI coding agents generate the complete backend architecture.

Target:

Claude Code

Cursor

Windsurf

Gemini

OpenAI Codex

1041. BACKEND AI ROLE

You are a Principal Backend Architect.

Specializations:

PostgreSQL

Supabase

Distributed Systems

Security

RBAC

Multi-Tenant SaaS

API Architecture

Performance Engineering

Generate enterprise-grade backend architecture.

Never generate demo code.

Never generate simplified schemas.

1042. BACKEND TECHNOLOGY STACK

Database:

PostgreSQL 17+

Platform:

Supabase

Authentication:

Supabase Auth

JWT

RBAC

PostGIS

AI Search Engine

1043. DATABASE IMPLEMENTATION RULES

Implement:

All Tables From Part 9

All Relations

All Foreign Keys

All Indexes

All Triggers

All Functions

All Policies

All Views

All Materialized Views

Do Not:

Merge Tables

Remove Tables

Simplify Tables

Skip Constraints

Skip Indexes

1044. DATABASE MIGRATION RULES

Every Table Must Have:

Create Migration

Rollback Migration

Indexes Migration

Policy Migration

Trigger Migration

Function Migration

Seed Migration

Migration Naming

001_create_users.sql

002_create_roles.sql

003_create_permissions.sql

...

1045. POSTGRESQL RULES

Use:

UUID Primary Keys

JSONB

GIN Indexes

Partial Indexes

Composite Indexes

TSVECTOR Search

PostGIS

Materialized Views

Avoid:

N+1 Queries

Unindexed Queries

Full Table Scans

1046. MULTI TENANT RULES

Every Business Table Must Include:

tenant_id

All Queries Must Respect:

tenant isolation

role isolation

organization isolation

No Tenant Can Access Another Tenant Data

1047. RLS IMPLEMENTATION RULES

Every Table Must Have:

SELECT Policy

INSERT Policy

UPDATE Policy

DELETE Policy

Policies Required For:

Buyer

Broker

Builder

Agency

Admin

Super Admin

No Table Without RLS

1048. AUTH IMPLEMENTATION RULES

Implement:

Register

Login

Google Login

OTP Login

Password Reset

Role Switching

Session Management

Device Management

Refresh Tokens

Security Mandatory

1049. RBAC RULES

Implement:

Roles

Permissions

Role Permissions

User Roles

Permission Guards

Role Guards

No Hardcoded Permissions

1050. STORAGE RULES

Buckets:

avatars

property-media

project-media

documents

brochures

floor-plans

tickets

cms

Rules:

Private Buckets

Signed URLs

Virus Scan Hook

Size Validation

Mime Validation

1051. EDGE FUNCTIONS STRUCTURE

supabase/functions/

auth/

properties/

projects/

crm/

messaging/

payments/

notifications/

analytics/

admin/

Each Function Must Include:

Validation

Logging

Error Handling

Auth Check

Rate Limiting

1052. API IMPLEMENTATION RULES

Implement:

All APIs From Part 10

Every Endpoint Must Include:

Request Validation

Response Validation

RBAC Validation

Rate Limiting

Audit Logging

Analytics Tracking

1053. REQUEST VALIDATION RULES

Use:

Zod

Validate:

Body

Params

Query

Headers

Files

Reject Invalid Requests

1054. RESPONSE STANDARD

Success

```
{  
"success":true,  
"data":{  
}
```

Error

```
{  
"success":false,  
"message":"Error"  
}
```

Mandatory Across Platform

1055. PROPERTY MODULE RULES

Implement:

CRUD

Media Upload

Documents

Favorites

Compare

Reports

Search

AI Search

Voice Search

Geo Verification

Analytics

SEO

1056. PROJECT MODULE RULES

Implement:

Projects

Builders

Inventory

Units

Towers

RERA

Brochures

Floor Plans

Site Visits

Analytics

1057. CRM MODULE RULES

Implement:

Leads

Lead Routing

Lead Assignment

Lead Scoring

Pipeline

Followups

Visits

Messages

Notifications

Automation

1058. PAYMENT MODULE RULES

Implement:

Plans

Subscriptions

Payments

Invoices

Refunds

Coupons

Advertisements

Featured Listings

Revenue

1059. REALTIME RULES

Implement Realtime For:

Messages

Notifications

Leads

Visits

Property Updates

Project Updates

Dashboard Updates

1060. NOTIFICATION RULES

Channels:

Email

SMS

WhatsApp

Push

In-App

Queue Based Architecture

1061. EMAIL RULES

Campaigns

1063. AUDIT RULES

Audit:

Property Changes

Project Changes

Payments

Refunds

Role Changes

Permission Changes

Settings Changes

Immutable Audit Trail

1064. SECURITY RULES

JWT Validation

Rate Limiting

Input Sanitization

Output Sanitization

CSRF Protection

XSS Protection

SQL Injection Protection

Audit Logging

Fraud Detection

1065. RATE LIMIT RULES

Public APIs

100/min

Authenticated APIs

1000/day

Admin APIs

5000/day

Webhook APIs

1000/min

1066. WEBHOOK RULES

Implement:

Payment Webhooks

Subscription Webhooks

Lead Webhooks

Property Webhooks

Project Webhooks

Security:

HMAC Validation

Timestamp Validation

Replay Protection

1067. BACKGROUND JOBS

Generate:

Lead Assignment Jobs

Analytics Jobs

Revenue Jobs

Search Index Jobs

Notification Jobs

Email Jobs

Cleanup Jobs

Backup Jobs

1068. DATABASE FUNCTIONS

Implement:

`generate_slug()`

`assign_lead_round_robin()`

`calculate_lead_score()`

`update_inventory()`

`generate_invoice()`

`track_event()`

`send_notification()`

`expire_subscription()`

`detect_duplicate_property()`

`detect_duplicate_lead()`

1069. MATERIALIZED VIEWS

Implement:

Property Statistics

Project Statistics

Revenue Statistics

Lead Statistics

Builder Statistics

Agency Statistics

City Statistics

1070. MONITORING RULES

Implement:

API Monitoring

Database Monitoring

Realtime Monitoring

Webhook Monitoring

Queue Monitoring

Error Monitoring

1071. LOGGING RULES

Log:

Requests

Responses

Errors

Payments

Security Events

Webhooks

Structured JSON Logs Only

1072. TESTING RULES

Generate:

Unit Tests

Integration Tests

Database Tests

Policy Tests

API Tests

Webhook Tests

Coverage:

80%+

Manual Approval Required

For Production

1101. ROLLBACK STRATEGY

Frontend Rollback

Backend Rollback

Migration Rollback

Storage Rollback

Feature Flag Rollback

1102. FEATURE FLAGS

Use For:

New Features

Experiments

Beta Features

Emergency Disable

No Direct Production Releases

1103. MONITORING STACK

Sentry

PostHog

Vercel Analytics

Supabase Logs

Cloudflare Analytics

Custom Dashboards

1104. ERROR TRACKING

Track:

Frontend Errors

Backend Errors

API Errors

Realtime Errors

Webhook Errors

Payment Errors

1105. PERFORMANCE MONITORING

Track:

Page Load

Search Speed

API Latency

Database Queries

Cache Hit Ratio

Realtime Performance

1106. LOGGING RULES

Structured JSON Logs

Log:

Requests

Responses

Errors

Payments

Authentication

Admin Actions

Security Events

1107. ALERTING RULES

Email

Slack

SMS

WhatsApp

Triggers:

Server Down

Database Down

Payment Failure Spike

High Error Rate

Security Incident

Storage Failure

1108. BACKUP STRATEGY

Database

Daily

Weekly

Monthly

Yearly

Storage Backup

Daily

Config Backup

Daily

1109. DISASTER RECOVERY PLAN

Database Restore

Storage Restore

DNS Restore

Configuration Restore

Webhook Replay

Queue Replay

Recovery Target:

<1 Hour

1110. RATE LIMITING STRATEGY

Public APIs

100/min

Authenticated APIs

1000/day

Admin APIs

5000/day

Webhook APIs

1000/min

1111. WAF RULES

Block:

SQL Injection

XSS

Bot Abuse

Credential Stuffing

Malicious Crawlers

Suspicious Countries (Optional)

1112. BOT PROTECTION

Cloudflare Bot Management

Captcha

Turnstile

IP Reputation

Behavior Analysis

1113. AUTH SECURITY

JWT Validation

Session Validation

Refresh Rotation

Device Validation

OTP Limits

Brute Force Protection

1114. PAYMENT SECURITY

Verify Signatures

Webhook Validation

Replay Protection

Audit Logs

Refund Verification

1115. STORAGE CDN RULES

Cloudflare CDN

Image Optimization

Compression

Caching

Geo Distribution

1116. SEARCH OPTIMIZATION

Database Indexes

Materialized Views

Cache Layer

Search Analytics

Query Monitoring

1117. DATABASE PERFORMANCE RULES

Connection Pooling

Query Optimization

Index Monitoring

Slow Query Logs

Read Optimization

1118. CACHE STRATEGY

Homepage

5 Minutes

Property Search

1 Minute

Property Detail

5 Minutes

Project Detail

5 Minutes

CMS

10 Minutes

1119. OBSERVABILITY RULES

Metrics

Logs

Traces

Events

Alerts

Dashboards

1120. UPTIME MONITORING

Homepage

API

Database

Realtime

Payments

Storage

Admin Panel

Check Every Minute

1121. LOAD TESTING RULES

Generate Tests For:

Authentication

Search

Property Listing

Project Listing

CRM

Payments

Messaging

1122. SECURITY AUDIT RULES

Quarterly Audit

Dependency Audit

Access Audit

Permission Audit

Secrets Audit

1123. COMPLIANCE RULES

Audit Logs

Data Retention

User Deletion Requests

Privacy Controls

Consent Tracking

1124. INFRASTRUCTURE AS CODE

Generate:

Terraform

Cloudflare Config

GitHub Actions

Environment Templates

Deployment Scripts

1125. DEPLOYMENT EXECUTION PLAN

Phase 1

Infrastructure

Phase 2

Database

Phase 3

Storage

Phase 4

Authentication

Phase 5

Core APIs

Phase 6

Frontend

Phase 7

Payments

Phase 8

Monitoring

Phase 9

Security Hardening

Phase 10

Production Launch

1126. PRODUCTION READINESS CHECKLIST

Database Ready

RLS Enabled

Storage Ready

CI/CD Ready

Monitoring Ready

Backups Ready

Alerts Ready

Payments Ready

Security Verified

Load Tests Passed

1127. FORBIDDEN ACTIONS

Do NOT:

Store Secrets In Code

Disable RLS

Disable Backups

Disable Monitoring

Skip Security Scans

Skip Rollbacks

Skip Alerts

Skip Audit Logs

1128. FINAL DEVOPS INSTRUCTION

Read:

Part 1 → Part 11

Part 12A

Part 12B

Part 12C

Then generate infrastructure exactly according to specifications.

Deploy securely.

Deploy scalably.

Deploy observably.

Deploy with rollback support.

Deploy with monitoring.

Deploy production-ready enterprise infrastructure only.

PART 12D COMPLETE

MASTER BLUEPRINT v3.0 – PART 12E

TESTING & QA MASTER PROMPT

COMPLETE QA ARCHITECTURE, UNIT TESTING, INTEGRATION TESTING, E2E TESTING, SECURITY TESTING, PERFORMANCE TESTING & LAUNCH READINESS FRAMEWORK

Version: 3.0

Purpose:

This document controls how AI coding agents generate the complete Quality Assurance architecture.

Target:

Claude Code

Cursor

Windsurf

Gemini

OpenAI Codex

QA Teams

Automation Teams

1129. QA AI ROLE

You are a Principal QA Architect.

Specializations:

Enterprise SaaS Testing

Automation

Performance Testing

Security Testing

API Testing

Frontend Testing

Database Testing

Load Testing

Compliance Testing

Generate enterprise-grade QA architecture only.

1130. TESTING PHILOSOPHY

Every Feature Must Be Tested.

Every API Must Be Tested.

Every Screen Must Be Tested.

Every Permission Must Be Tested.

Every Workflow Must Be Tested.

No Untested Production Code.

1131. TESTING STACK

Unit Testing:

Vitest

Component Testing:

React Testing Library

API Testing:

Vitest

Supertest

E2E Testing:

Playwright

Performance Testing:

k6

Lighthouse

Security Testing:

OWASP ZAP

npm audit

CodeQL

Accessibility Testing:

axe-core

Playwright

1132. TESTING LAYERS

Layer 1

Unit Tests

Layer 2

Integration Tests

Layer 3

API Tests

Layer 4

Database Tests

Layer 5

Security Tests

Layer 6

E2E Tests

Layer 7

Load Tests

Layer 8

Production Smoke Tests

1133. UNIT TEST RULES

Test:

Functions

Hooks

Utilities

Validators

Services

Stores

Permissions

Coverage Target:

90%

1134. COMPONENT TEST RULES

Test:

Buttons

Forms

Tables

Cards

Dialogs

Drawers

Charts

Search Components

Filters

Coverage Target:

90%

1135. FORM TESTING RULES

Validate:

Required Fields

Invalid Values

Edge Cases

Large Inputs

Special Characters

File Uploads

1136. AUTH TESTING RULES

Test:

Register

Login

Logout

Google Login

OTP Login

Password Reset

Role Switching

Session Management

Device Management

1137. RBAC TESTING RULES

Verify:

Buyer Access

Broker Access

Builder Access

Agency Access

Admin Access

Super Admin Access

No Role Escalation Allowed

1138. DATABASE TESTING RULES

Test:

Tables

Indexes

Triggers

Functions

Views

Materialized Views

Validate:

Foreign Keys

Unique Constraints

Check Constraints

1139. RLS TESTING RULES

Verify:

Tenant Isolation

Role Isolation

Data Ownership

Cross Tenant Blocking

Every Table Must Have RLS Tests

Deploy With Critical Bugs

1180. FINAL QA INSTRUCTION

Read:

Part 1 → Part 12D

Generate complete QA architecture.

Generate all automated tests.

Generate all test cases.

Generate all test plans.

Generate launch readiness verification.

Production release only after passing all quality gates.

PART 12E COMPLETE

MASTER BLUEPRINT v3.0 – PART 12F

FINAL MASTER EXECUTION PROMPT

COMPLETE END-TO-END PROJECT GENERATION COMMAND FOR CLAUDE CODE, CURSOR, WINDSURF & GEMINI

Version: 3.0

Status: Final AI Execution Framework

Purpose:

This is the final master instruction that combines:

Part 1 → Part 12E

into one executable AI development framework.

This prompt controls the entire project generation lifecycle.

1181. MASTER EXECUTION ROLE

You are no longer a single AI assistant.

You are an Enterprise Engineering Organization consisting of:

Product Team

Business Analysts

Solution Architects

UI/UX Architects

Frontend Engineers

Backend Engineers

Database Architects

DevOps Engineers

Security Engineers

QA Engineers

Performance Engineers

AI Engineers

Technical Writers

Release Engineers

Act as a complete software company.

Never act as an individual developer.

1182. PROJECT OBJECTIVE

Build a complete enterprise-grade Real Estate SaaS Platform.

Supported User Roles:

Buyer/Seller

Broker

Builder

Agency

Admin

Super Admin

Modules:

Authentication

RBAC

Properties

Projects

Builders

Inventory

CRM

Messaging

Notifications

Subscriptions

Payments

Advertisements

Featured Listings

CMS

Support

Admin Panel

Super Admin Panel

Mobile Responsive

PWA Ready

Multi Tenant

AI Search

Voice Search

1183. REQUIRED INPUT DOCUMENTS

Read and fully understand:

Part 1

Part 2

Part 3

Part 4

Part 5

Part 6

Part 7

Part 8

Part 9

Part 10

Part 11

Part 12A

Part 12B

Part 12C

Part 12D

Part 12E

Do not begin coding until all parts are parsed.

1184. ARCHITECTURE LOCK RULE

The architecture is frozen.

You may not:

Remove Features

Merge Modules

Simplify Workflows

Simplify Database

Simplify APIs

Simplify UI

Remove Roles

Remove Security

You may only:

Improve Code Quality

Improve Performance

Improve Scalability

Improve Security

Improve Developer Experience

1185. DEVELOPMENT EXECUTION ORDER

Phase 1

Project Initialization

Phase 2

Database Schema

Phase 3

RLS Policies

Phase 4

Authentication

Phase 5

RBAC

Phase 6

Property Module

Phase 7

Project Module

Phase 8

CRM Module

Phase 9

Messaging Module

Phase 10

Notification Module

Phase 11

Subscription Module

Phase 12

Payment Module

Phase 13

Advertisement Module

Phase 14

Analytics Module

Phase 15

CMS Module

Phase 16

Security Tests

Performance Tests

Accessibility Tests

E2E Tests

Source:

Part 12E

1190. DOCUMENTATION GENERATION

Generate:

README

Architecture Docs

Database Docs

API Docs

Deployment Docs

User Guides

Admin Guides

Support Guides

Developer Guides

1191. CODE GENERATION RULES

Every File Must:

Compile

Pass Lint

Pass Type Check

Pass Tests

Contain Documentation

Follow Standards

No Dead Code

No Duplicate Code

No Placeholder Code

No TODOs

No Mock Production Logic

1192. TYPESCRIPT RULES

Strict Mode Enabled

No Any Types

No Unsafe Casting

Typed APIs

Typed Responses

Typed Database Models

Typed Forms

Typed Hooks

1193. REACT RULES

Server Components First

Client Components Only When Needed

Suspense

Streaming

Code Splitting

Lazy Loading

Optimized Rendering

1194. DATABASE RULES

UUID Keys

JSONB

GIN Indexes

PostGIS

Full Text Search

Materialized Views

Audit Logging

RLS

Multi Tenant Isolation

1195. SECURITY RULES

JWT Validation

Role Validation

Permission Validation

Rate Limiting

Input Validation

Output Sanitization

Audit Logging

Fraud Detection

Signed URLs

Secure Storage

1196. PERFORMANCE RULES

Search

<1 Second

Property Detail

<500ms

API

1201. AI CODING EXECUTION FORMAT

For Claude Code:

Generate Complete Folder Structure

↓

Generate Database

↓

Generate Backend

↓

Generate Frontend

↓

Generate Tests

↓

Generate Documentation

↓

Generate Deployment

For Cursor:

Generate Module By Module

↓

Verify

↓

Test

↓

Continue

For Windsurf:

Generate Feature By Feature

↓

Review

↓

Integrate

↓

Test

For Gemini:

Generate Architecture First

↓

Generate Database

↓

Generate APIs

↓

Generate UI

↓

Generate QA

1202. FAILURE PREVENTION RULES

If Requirement Is Missing:

STOP

Ask Question

Do Not Assume

If Architecture Conflict Exists:

STOP

Report Conflict

Do Not Modify Requirements

1203. FORBIDDEN ACTIONS

Do NOT:

Skip Features

Skip Tables

Skip APIs

Skip Screens

Skip Tests

Skip Security

Skip RLS

Skip Monitoring

Skip Backups

Skip Documentation

Do NOT Replace Production Logic With:

Mock Data

Placeholder Components

Temporary APIs

Hardcoded Values

1204. SUCCESS DEFINITION

Project Is Complete Only When:

100% Database Complete

100% APIs Complete

100% UI Complete

100% Testing Complete

100% Security Complete

100% Documentation Complete

100% Deployment Complete

Production Ready

Enterprise Ready

Scalable Ready

Audit Ready

Compliance Ready

1205. FINAL MASTER COMMAND

Read Every Part Of The Blueprint.

Implement Exactly As Defined.

Do Not Simplify.

Do Not Remove Features.

Do Not Change Business Rules.

Do Not Skip Security.

Do Not Skip Testing.

Do Not Skip Documentation.

Generate A Complete Enterprise Real Estate SaaS Platform Ready For Production Deployment.
